

## Comments, Code Segments, and Program Documentation

In AP Classroom, watch 1.3 Daily Video 2 and 3, “Program Design and Development.”

1. Define Program Documentation.
2. Describe the purpose of Program Documentation.
3. Why do programmers place comments in their code?
4. Do comments affect how a program is run? Why or why not?
5. Not all programming environments support comments. What other methods can programmers use?
6. Why should programmers document a program throughout its development?
7. Programmers often collaborate or use code segments developed by another source. What are they required to do to acknowledge code written by someone else?
8. Where can this information be found?
