

SQL Getting Started

www.mysqltutorial.org is a great resource for learning more about MySQL. To make up a bit for some of the time lost recently in class, I'd like for you to read the Section 2 and Section 3 the Basic MySQL Tutorial found at: <http://www.mysqltutorial.org/basic-mysql-tutorial.aspx>

You can execute the sample queries in the Classic Models database we installed yesterday (Tuesday) in class.

Take notes on what you read.
