Abstract

Type the English abstract here. The abstract should be written in Times New Roman 10 Italic. It must include the following components: main issue/background, objectives, methods, results, and conclusion. The abstract should be written as a single paragraph, without references, abbreviations/acronyms, or footnotes. It must not be presented in mathematical form, as a question, or as a hypothesis. The abstract should not be copied or pasted from sentences in the main text. The English abstract should contain 150–200 words.

INTRODUCTION

The introduction contains the conditions or problems that underlie or inspire the implementation of the activities and the objectives of the research.

METODE

Describe the methods used to solve problems. Examples of methods: a) Community Education, for example counseling aimed at increasing understanding and awareness, b) Science and Technology Diffusion, for example activities that produce products for target groups, c) Training, for example activities accompanied by demonstrations or examples to produce certain skills, d) Mediation, for example activities that show community service implementers as mediators in solving problems that exist in society, e) Advocacy, for example activities in the form of assistance to target groups. Also explain the characteristics of the target groups who are partners in research.

RESULTS AND DISCUSSION

The discussion explains the research findings, which can include increased knowledge, skills, behavioral changes, or products. The results should also demonstrate the level of achievement of the

activity's targets. The written results or outputs should be accompanied by photographs, tables, graphs, charts, or other relevant illustrations, and the sources should be clearly stated. The discussion should be structured sequentially according to the previously explained activity objectives. Each discussion should be accompanied by logical arguments linking the research results to theory, the results of similar activities, and/or previous research findings.

Figure 1. Example of a picture or illustration (Hovmand, 1995)

Table 1. List of internationally reputable journals		
No	Commodity	Number (tail)
1.	Free-range Chicken	37,744
2.	Broiler Chicken	6,411,350
3.	Laying Breed Chickens	479,000

Source: Primary data processed by researchers (2019)

CONCLUSION

Written concisely but describing the substance of the results of research and recommendations for subsequent research activities.

ACKNOWLEDGEMENT (Optional)

Acknowledgments are primarily addressed to research funders or donors. They can also be extended to those who assisted in the implementation of research activities.

REFERENCES

All references cited in the article text must be listed in the Bibliography section. The bibliography should contain references from primary sources (scientific journals, comprising at least 80% of the total bibliography) published within the last 10 years. Each article should contain at least 10 references. It is highly recommended to use a reference management application such as Mendeley, EndNote, Zotero, or others to facilitate editing and review. The bibliography should be written according to the APA 6th (American Psychological Association) style.
