FOR PRACTITIONERS

This document provides ready-to-use language that can be inserted into your district's existing informed consent for evaluation or consent for services form. Select the sections that apply, adapt the language to fit your context, and consult with your administration before use.

How to Use This Document

Each section below is written as standalone language you can copy directly into an existing consent form. Use what applies to your practice and adjust as needed.

- **Choose your sections.** Not every section may be needed. Pick the language that fits the services you provide and the structure of your current form.
- **Fill in the blanks.** Bracketed text [like this] should be replaced with your specific information.
- **Check with your district.** Consult your administration and follow local policies to make sure the language meets your district's requirements.

Section 1: AI Use Introduction

Add near the beginning of your consent form, where services are described.

As a member of your child's school-based team, I may use artificial intelligence (AI) tools to support the services we provide. These tools help us provide more thorough analysis, identify meaningful patterns in your child's data, and communicate results in clear, easy-to-understand language so you know exactly what the findings mean and what comes next. AI is used only as a support tool and never replaces the professional judgment of a licensed school psychologist. All AI-generated content is reviewed, edited, and personalized before anything is finalized or shared.

Section 2: What AI Does and Doesn't Do

Add where your form describes evaluation or service procedures.

AI tools may be used to support the following aspects of your child's services:

- Analyzing assessment data and identifying patterns
- Drafting report language (always reviewed and edited by a licensed school psychologist)
- Suggesting evidence-based interventions tailored to your child's needs
- Supporting documentation and progress monitoring

All eligibility decisions and recommendations are made by qualified professionals. All AI-generated content is reviewed for accuracy, edited, and personalized before being finalized or shared. You may request information about the specific AI tools used at any time.

Section 3: Data Protection & Privacy

Add where your form addresses confidentiality or data handling.

We protect your child's information through the following safeguards:

- **FERPA Compliance:** All AI tools selected are independently evaluated as FERPA compliant (such as [tool name])
- **Data Security:** Information is encrypted and stored on secure, FERPA-compliant servers
- **Limited Access:** Only authorized school personnel can access your child's information
- **No Data Sale:** Your child's data is never sold or used for advertising purposes

Section 4: Parent/Guardian Rights

Add where your form addresses parent rights, or append to existing rights language.

Regarding the use of AI in your child's services, you have the right to:

- Be fully informed about the nature, purpose, and scope of any services provided to your child, including how AI is used
- Request that AI not be used in any part of your child's evaluation or services
- Withdraw consent for future services in accordance with district procedures, without affecting the student's right to a free appropriate public education
- Review and inspect your child's education records in accordance with FERPA
- Receive information about how evaluation data and records are maintained, used, and protected

Section 5: AI Consent Acknowledgment

Add to your form's signature section, or include as an additional signature line.

I have read and understand how AI may be used to support my child's school-based psychological services. I have had the opportunity to ask questions and feel informed enough to make this decision.

Parent/Guardian Signature

Date

Student Name

Quick Reference: Short-Form Options

If space is limited, the following condensed versions can be used in place of the full sections above.

One-Sentence AI Disclosure

AI tools may be used to support your child's school-based psychological services; all AI-generated content is reviewed, edited, and approved by a licensed school psychologist before being finalized or shared.

One-Sentence Data Protection

Any AI tools used in your child's services are FERPA compliant, and your child's data is encrypted, accessible only to authorized personnel, and never sold or used for advertising.

One-Sentence Consent

I understand and consent to the use of AI tools as described above in support of my child's school-based psychological services.
