Welcome to my commission document!
here you can find information on the following:

- How it works
- Current commission status & updates
- Terms of service
- FAQ
- Links to my stuff

[DISCLAIMER] If you take my art without paying and using it without permission I will publicly post about it to spread awareness that this behavior is unacceptable.

How it works

Here is step by step how to commission me:
Open a PM with me on Twitter.

Make sure to specify in your message that you would like to commission me. I will not be responding to messages that just say “hi”.

Once we have discussed what you would like I will be sending you my paypal.
I take 100% payment upfront.

It takes on average 1-2 weeks for drawings to be completed but it can also take longer if I’m very busy.

You will be updated on the process through Twitter. You will get updates on the sketch, on the line art and finally the coloring before the final image.

All avatar drawings are drawing in 1000x1000 pixels unless you specifically want a different format.

Current commission status & updates

8 commission
Waiting time: 1-2 weeks

Terms of service

- You must be 16 or older to commission me. If you are younger than that I will need confirmation of your parents' agreement.
- I take 100% payment upfront
- I will not draw blood, gore, nudity, anything inappropriate
- Big changes can only be made during sketching. If you approve the sketch that means only small changes can be made past that.
- Any major changes you want once the sketch was approved I will charge $5 for unless if it was a mistake by me
- You can not claim that you made the art
- I only accept full refunds if I have not started on the art yet, once I've started only partial refund is possible. If you wish to refund, you are responsible for the paypal fees which can not be refunded.
- Please do not ask me daily or frequently for progress, it will not make me work any faster
- I have the rights to reject commissions

Frequently asked questions

Do you do free art?
No, I will under no circumstances do free art on request. The only time I will be doing free art is either if I want to draw someone (like a friend or someone I look up to) or giveaways which I do once in a while on Twitter.

What program and tablet do you use?
I use Photoshop CC and a Wacom intuos draw tablet.

How did you learn how to draw?
I started drawing as a hobby back in 2013 and I am self taught. I learned mostly by looking through deviantart and practicing on my 3DS on the game called “Colors 3D” before switching to drawing in Photoshop with a drawing tablet.
I wish I could give you better advice but most of it comes down to practice.

How many commissions have you done in total?
It’s hard to believe but since I started commissions back in 2014, I have done over 600 commissions.

How long will your commissions be open?
I’m honestly not sure. I started doing commissions because it was my only source of income but now I have a job so I’m doing this as a side thing. I am not sure how long I will be doing commissions but I will probably be doing it until I do not enjoy it anymore.

Do you add on discord or Hypixel?
No sorry I will not be accepting friend requests anywhere as that is reserved for friends.

Will you give art advice or tips on how I can make art too?
Currently I will be able to answer simple and short questions through twitter pms and discord.

Can I trace your art to make my own profile picture?
No, I believe tracing is a good way to practice your art in private, however I do not approve of tracing for personal or commercial use. I work very hard on perfecting my art style and I believe it is not ok to steal work from others.
