Sudarshanpur, Raiganj, Uttar Dinajpur

(Affiliated to University of Gour Banga, Malda)

Recognized by UGC U/S 2f & 12(B)

NAAC accredited College with "B"+Grade (December`2016)

Event Summary: Annual Cultural Program and Exhibition- 2022

In 2022, Raiganj Surendranath Mahavidyalaya hosted its Annual Cultural Program and Exhibition from April 29th to April 30th. This event was a vibrant celebration of creativity, innovation, and cultural diversity, bringing together students from different departments of both Science and Arts streams.

One of the highlights of the event was the model exhibition, where students showcased their talents and skills on various topics. Specifically, 21 students from the 2nd, 4th, and 6th semesters of the Botany department participated in this exhibition. Their exhibits covered a wide array of themes, ranging from new scientific ideas to their practical applications in daily life, as well as raising awareness about different environmental issues and proposing solutions to mitigate adverse conditions.

The participation of these students not only demonstrated their academic prowess but also highlighted their commitment to addressing real-world challenges through innovative thinking and scientific inquiry. Their contributions enriched the overall cultural and intellectual atmosphere of the event, inspiring others to engage with important issues facing society today.

The topics they highlighted during the above program are as follows:

Principle of RT-PCR for covid-19 detection,

Smart irrigation technique

Solid Waste Management

Vermi-compost production and

Beneficial Uses of Tobacco plant.

It sounds like the students are addressing some pressing issues in their community with innovative solutions. RT-PCR's application in Covid-19 detection is crucial for effective testing and control of the virus. Smart irrigation techniques can certainly help conserve water, especially in areas facing water shortages like Uttar Dinajpur district. Recycling solid waste and utilizing by-products by making efficient use of available resources. Vermicompost production offers a sustainable alternative to chemical fertilizers, reducing environmental and health risks associated with their overuse. Additionally, raising awareness about the health impacts of smoking, both for active and passive smokers, is essential for promoting public health but there are different positive aspects of tobacco plants. These efforts demonstrate a proactive approach to addressing various challenges facing the community.

The honourable administrator , TIC and judge juries are very much pleased with topic explanations and the awareness messages. It's clear that the efforts put forth by the Department of Botany in presenting their topics and raising awareness have been well received and highly valued. Securing the first position among the science departments is a remarkable achievement and speaks volumes about the excellence and dedication of everyone involved.
