Blank copy if you want to make a copy and go through this on your own:

https://docs.google.com/spreadsheets/d/1VpjvDfjLV_seXUX0EOmjACJQCEk0R_sLk4vi7ms_zs/copy

- Use the drag feature to add objectids (review)
 - select the square at the bottom of the first cell for objectids
 - drag it down to the bottom.
- Use a filter
 - Filter the youtube videos based on if they have or don't have an id
 - Click the filter button at the top right or select the filter option from the "Data" menu
 - All cells are currently selected.
 - Uncheck the "Blanks" cells by clicking "Blanks" then clicking the "Ok" button at the bottom.
- Use the drag features to edit all videos
 - Same Type, Format, and Language
 - Select the three cells
- Filter to just include blanks
 - Use the drag feature to edit all images
- Walk through editing sitw
 - add ".jpg" to all filenames using a formula
 - copy and paste just the values so that's what you have left
 - say you made your filenames lowercase?
 - =lower(B2)
- Fill in titles with objectids for filler
- Find a latitude and longitude
 - Go to Google Maps
 - Search for location
 - Right click, copy lat long by selecting first option
- Split lat long using the "Split text to columns" option in the Data Menu
 - Drag them down- note that the number at the end successively
