MULTIPLE CHOICE

On 28 October 1928 in Jakarta, youths from across Indonesia held the Indonesian Youth Congress. This congress marked the official meeting to urge the independence of Indonesia.

During this congress, the song "Indonesia Raya" was first introduced by Wage Rudolf Supratman, a young reporter and musician. Supratman performed the "Indonesia Raya" on the violin. The lyric of the song was able to awake the spirit of unity among the Indonesian youth of the archipelago. The song marked the birth of the all-archipelago nationalist movement in Indonesia and supported the idea of one single "Indonesia".

On this occasion, a declaration known as The Youth Pledge was made and declared by young Indonesia Nationalists. They declared the ideas of one motherland- Indonesia, one nation- Indonesians and one language- Indonesian language. Since the proclamation of independence of the Republic of Indonesia on the 17 August 1945 "Indonesia Raya" becomes the national anthem of Indonesia

Mohammad Hatta

Every year has its great men and women who are remembered for what they have done for their country. One of Indonesia's great men is Dr. Mohammad Hatta. He was a man with deep love for his country and people.

Dr Mohammad Hatta was born in Bukittinggi on August 12th, 1902. While still in Junior high school in Bukittinggi, he became interested in politics and joined the league of young Sumatera.

He left Bukittinggi to study in Batavia. Then he went to Netherlands. He studied economics and gained a doctorate degree there. During his stay there he was active in the national movement. Because of his activities, he was arrested.

In 1923, Hatta returned to Indonesia. He joined in political organization called "Pendidikan Nasional Indonesia". One of its goals was to develop political awareness among the Indonesia people. His activities again led to his arrest. The colonial government exiled him to Bowen Digul, and later to Bandanaira. Shortly before the Japanese invasion, he was brought back to Java.

When the Javanese surrendered in August 1945, Soekarno and Hatta proclaimed Indonesia's independence. Hatta became the first vice- president of The Republic of Indonesia

In 1956 Hatta resigned as a vice president and devoted himself to writing. On March 14, 1981 Dr. Mohammad Hatta passed away in Jakarta.

Nowadays, he is no longer living among us. However, his spirit of loving the country and nation is one of the reasons why he is well remembered.

8. Why was Moh, Hatta arrested? Because...
- He joined in political organization in Batavia
 - He proclaimed the indonesia's independence with Soekarno
 - He developed the political awareness among indonesians
 - He had a spirit of loving the country and the nation
 - He was interested in politics and joined the league of young Sumatra
9. "In 1956 Hatta resigned as a vice president". The synonym of the underlined word is ...
- Gave
 - Brought up
 - Surrendered
 - Kept in position

Lately, concerns have arisen that Jakarta, the capital city of Indonesia, and its immediate surroundings are threatened to experience a clean water crisis by 2025. Clean water, which is produced by two private operators – PAM Lyonnaise Jaya (Palyja) and Aetra Air Jakarta – currently totals 18.7 m³ per second. However, by 2025, demand for clean water will reach 41.3 m³/second as the population of Jakarta is estimated to grow to 14.6 million people from 9.6 million currently (the unofficial figure is possibly much higher).

It has been reported that city-owned property developer Jakarta Propertindo (Jakpro) and city-owned developer Pembangunan Jaya will acquire a combined 100 percent stake in Palyja. If the Jakarta administration has a direct stake in the city water operators, it will increase public supervision on the local clean water industry.

PAM Lyonnaise Jaya, which manages the clean water supply in the west side of Jakarta, is a private water operator that is partly controlled by Astra International through its subsidiary Astratel Nusantara. Palyja has been active in Jakarta for about 16 years. However, last year a law suit was filed demanding that the court will annul the agreement between city water operator PAM Jaya and Palyja and Aetra Air Jakarta (Aetra) claiming that public access to affordable clean water has been hindered.

Based on information from the World Bank, Indonesia plans to achieve universal clean water access by 2019 but almost half of the population still do not have access to clean water at present.

12. What is the text about? It's about
- a. The growth of water supply
 - b. PAM Lyonnaise Jaya
 - c. Clean water industry
 - d.** City water operators
 - e. Clean water crisis
13. What is predicted to happen in 2025?
- a. Public access to affordable clean water will be hundred
 - b. Indonesia to achieve universal clean water access
 - c. There will be more water supply operators

14. Paragraph one discusses...
- The demand for clean water
 - Clean water crisis in Jakarta in 2025
 - The rapid growth of Jakarta population
 - The production of clean water in Jakarta
 - Two private operators producing clean water

Don't laugh at me

sung by :Mark Wills

I'm a little boy with glasses
 The one they call the geek
 A little girl who never smiles
 'Cause I've got braces on my teeth
 And I know how it feels.
 To cry myself to sleep.
 I'm that kid on every playground
 Who's always chosen last
 A single teenage mother
 Tryin' to overcome my past
 You don't have to be my friend
 Is it too much to ask?

Chorus:

Don't laugh at me, don't call me names
 Don't get your pleasure from my pain
 In God's eyes we're all the same
 Someday we'll all have perfect wings
 Don't laugh at me.

I'm the cripple on the corner
 You pass me on the street
 I wouldn't be out here beggin'
 If I had enough to eat
 And don't think that I don't notice
 That our eyes never meet.
 I lost my wife and little boy

Someone crossed that yellow line
 The day we laid 'em in the ground
 Is the day I lost my mind
 Right now I'm down to holdin'
 This little cardboard sign.

- 15 What is the topic of the lyric above?
- Children who have been orphans
 - Children who have been teased or bullied
 - Boys and Girls who beg for money on the street

Acid rain is rain that is highly acidic because of sulfur oxides, nitrogen oxides, and other air pollutants dissolved in it. Normal rain is slightly acidic, with a pH of 6. Acid rain may have a pH value as low as 2.8.

Acid rain can severely damage both plants and animals' lives. Certain lakes, for example, have lost all fish and plant life because of acid rain. Acid rain comes from sulfur in coal and oil. When they burn, they make sulfur dioxide (SO₂). Most sulfur leaves factory chimneys as the gaseous sulfur dioxide (SO₂) and most nitrogen are also emitted as one of the nitrogen oxides (NO or NO₂), both of which are gasses. The gasses may be dry-deposited—absorbed directly by the land, by lakes, by the surface, or by vegetation. If they are in the atmosphere for anytime, the gasses will oxidize (gain an oxygen atom) and go into solution as acids.

Sulfuric acid (H₂SO₄) and the nitrogen oxides will become nitric acid (HNO₃). The acids usually dissolve in cloud droplets and may travel great distances before being precipitated as acid rain. Catalysts such as hydrogen peroxide, ozone, and ammonium help promote the formation of acids in clouds. More ammonium (NH₄) can be formed when some of the acids are partially neutralized by airborne ammonia (NH₃). Acidification increases with the number of active hydrogen (H⁺) ions dissolved in acid. Hydrocarbons emitted by, for example, car exhausts will react in sunlight with nitrogen oxides to produce ozone.

Although it is invaluable in the atmosphere, low-level ozone causes respiratory problems and also hastens the formation of acid rain. When acid rain falls on the ground it dissolves and liberates heavy metals and aluminum (Al). When it is washed into lakes, aluminum irritates the outer surfaces of many fish. As acid rain falls or drains into the lake the pH of the lake falls.

Forests suffer the effect of acid rain through damage to leaves, through the loss of vital nutrients, and through the increased amounts of toxic metals liberated by acid, which damage roots and soil microorganisms.

19. What is the purpose of the text?

- a. To report the acid rain in general
- b. To explain the process of acid rain
- c. To persuade the reader to prevent acid rain
- d. To discuss the danger of acid in the air
- e. To present two different opinions on acid rain process

20. After the sulfuric acid and the nitrogen oxides become nitric acid, ...

- a. It is absorbed directly by the vegetation
- b. it usually dissolves in cloud droplets
- c. It emits another sulfur gas
- d. It radiates an oxygen atom
- e. It dissolves in the lake

21. What is the impact of acid rain?

- a. It damages the plants
- b. It damages living things
- c. It produces toxic
- d. It kills animals
- e. It kills microorganism

Indonesian Tourism Industry Association Bali offers free accommodation

Jakarta | Tue, November 28, 2017 | 12:35 pm

Indonesian Tourism Industry Association (GIPI) Bali is offering free accommodation for stranded tourists at the Ngurah Rai International Airport Bali that has been closed since Nov. 27 due to volcanic ash from Mount Agung.

"Not a single tourist should stay overnight at the airport, GIPI Bali together with Badung regional administration is providing free accommodation for tonight and tomorrow, if the airport remains closed," said GIPI Bali head, Gus Agung.

"We've set aside two billion rupiahs for two nights, one room is allocated for two guests," Gus added.

The accommodation also includes breakfast.

In the era of social media, Gus Agung mentioned, unsatisfied tourists are free to express their frustrations. "But if they are served well with respect, they will also post their happiness amid the panicky situation," he added.

Tourism minister Arief Yahya praised GIPI Bali for initiative, "What is being done by the Badung regency and GIPI Bali is very good. This is what we call a long-term investment," he said.

The two billion rupiahs is relatively small compared to Badung's average Locally-Generated Income (PAD) in a year that is at seven trillion rupiahs.

27. The writer's intention in writing the above text is
- To tell the people are panic because of the ash
 - To tell the audience about some new worthy
 - To describe the situation due to volcanic ash
 - To tell the audience free accommodation
 - To describe the panicky situation
28. From the text, we may conclude that ...

 - The fund allocated for serving the tourists is reasonable
 - GIPI Bali and Badung regency have served the tourists well
 - Unsatisfied tourists express their frustration in social media

The Use of Formalin and Other Additives in Foods

The use of formalin and other dangerous preservatives in food has been a serious problem for three reasons. Firstly, formalin is not for human beings, but it is for biological specimens and experiments. Formalin in Biology is a 10% solution of formaldehyde in water which is usually used as a disinfectant or to preserve biological specimens. Thus, it is not for food preservatives. Of course when it is used for food preservative, it will be very dangerous to human's body.

The second reason is that there is no tight control from the government. This condition makes the people's health is really in a threat. When the control is weak and the use of formalin was spread wide all over the Indonesian regions, and these days it has really happened, the citizen's bodies will be badly contaminated with the poisons. Fish or food traders still sell their products which contain formalin and dangerous preservatives. Can you imagine that our digestive system absorbs the substance that should be for the human and animal corpses?

Considering the reasons, we can make a conclusion that the use of formalin and other preservatives is really a serious problem if it is not resolved immediately.

29. The purpose of the text above is ...

My sorrow was very great. I did not feel happy for a year.

One day i ordered my new servant to bring me a cow. I wanted to kill the cow fot its meat. My new servant brought me the servent who was a cow now. The cow moaned so loadly that i did not kill it.

I told my servent to bring me a calf and he brought me my son who was a calf now. When the calf saw me, it was very glad. It ran up to me and rubbed its head againts me. I said to the servant, "take this calf away and bring me another".

My wife called to me, " You must kill this one. This calf is very fat". But i didn't listen to her.

"Take it away", i said to my servant

The next day, i was sitting in my room when my servant came to me and said, "o, my master, i will you a tale which will make you happy"

"i have a daughter who studied magic. Yesterday, when you gave me the calf i went home. I went into the house. When my doughter saw the calf she covered her face. First she cried and then she laughed".

At least she said to me, "O, My father why do you bring a strange man into the house to look at me?"

I answered, "i did not see a man"

"this calf is your master's son," she said. I laugh because he is my master's son i cry because he is a calf".

Then i went with my servant to the house to see his daughter, "Is it true what you have said about the calf?"

"Yes, My master, He is you son".

I asked her, "Can you give me back my son?"

My servant's daughter took a bottle of water out of the cupboard. She poured some water on the head of the calf and said, "Dear Calf, change into a man again"

When we had a holiday last year, my family and i went to a place at the seaside and borrowed a boat from one of Our friends. We sailed and finished on the sea all day.

When the sea was rough, we sailed on a small lake near the sea instead. There were not many fish in the lake, but in the sea we caught a lot with the hook, line and small pieces of bread.

When the weather was fine, we collected pieces of dried wood and fired or grilled our fish over them on the beach.
