

GTM - Contact Form 7 Submission Tracking

Code -01

Listener Code:

```
<script>
document.addEventListener( 'wpcf7mailsent', function( event ) {
  window.dataLayer.push({
    "event" : "contact_form_submit",
    "formId" : event.detail.contactFormId,
    "response" : event.detail.inputs
  })
});
</script>
```

If first code not work use the 2nd code

```
<script>

document.addEventListener('wpcf7submit', function (event) {
  var formInputs = event.detail.inputs;
  var formId = event.detail.contactFormId;
  var pageId = event.detail.containerPostId;

  var inputs = {}
  for ( var i = 0; i < formInputs.length; i++ ) {
    inputs[formInputs[i].name] = formInputs[i].value;
  }

  window.dataLayer = window.dataLayer || [];
  dataLayer.push({
    event: 'contact_form_submit',
    formId: formId,
    pageId: pageId,
    inputs: inputs,
  });
}, false);
</script>
```
