

Injury Policy

For students that sustain an injury while in or out of school, and seek medical attention, if there are specific limitations or needs when the child returns, the parent must provide documentation by a medical provider prior to returning to school within 24 hours. If your student is injured and they don't seek medical attention, if they require restrictions from PE due to their injury, you have 24 hours to provide a doctor's note or else they are responsible for participating. Examples of this include, but aren't limited to, a student's injury requires an elevator pass, if medications are needed for pain control, and/or medical assisted devices needed (crutches, wheelchair, slings, boots), etc. Parents should contact Nurse Driscoll at the elementary school or Nurse Brothers, at the middle school if special considerations are needed.
