

A Tutorial to Fix Out-of-Sync Booting Time for Zidoo Media Players

Tool Download

1、 Zidoo RTD1619DR product

Applicable to

Z9X&Z10PRO&Z1000PRO&UHD3000&NEO X&NEO S&NEO α
products

ZIDOO_NTP_RTD1619DR_v1.1.apk

Download link:

https://mega.nz/file/pq83iaTJ#207isaQ0qY9n54hB0LBtJeBOMNBxSW8zKP1qx0x_k1g

2、 Zidoo RTD1619BPD product

Applicable to Z9XPRO&Z20PRO&Z2000PRO&Z2600&UHD5000
products

ZIDOO_NTP_RTD1619B_v1.1.apk

Download link:

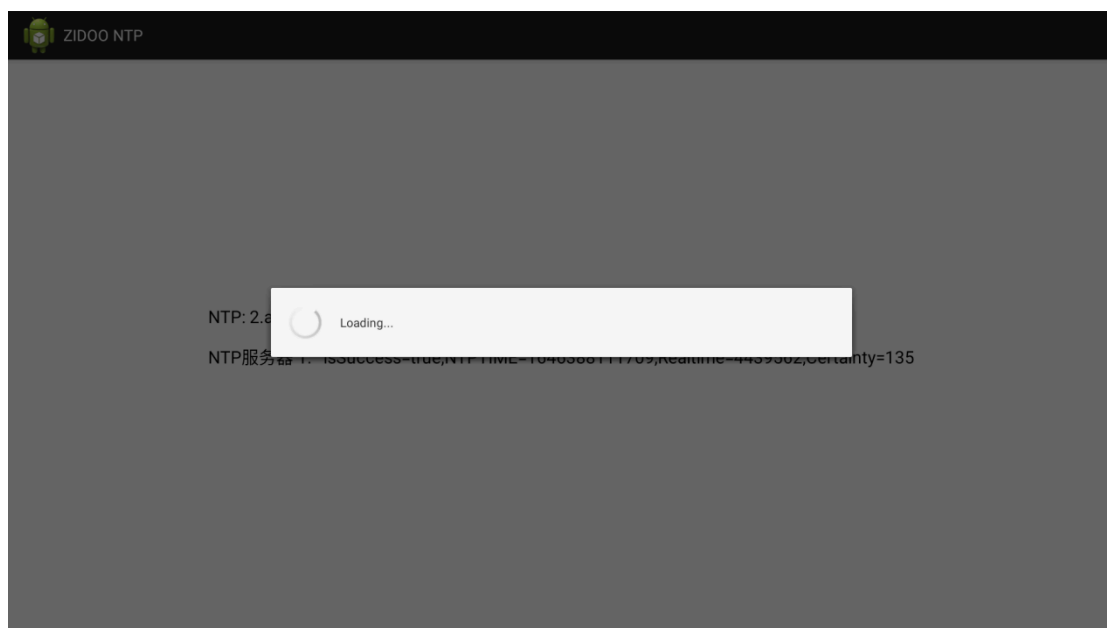

<https://mega.nz/file/l3FCVKwJ#uA-zkvH5dWCuHqEaq00UK9ii-A23OLOWFvH1Su4Pje4>

Operating instructions

Download ZIDOO_NTP and install it to the Zidoo player.

After running **ZIDOO NTP**, the software will automatically repair the NTP server.

When the software prompts that the NTP server has been fixed, restart the player to check if the time is obtained normally

Note: After the repair is completed, **restart the player** and the ZIDOO NTP software can be uninstalled directly.

```
NTP: 2.android.pool.ntp.org
NTP服务器 1: isSuccess=true,NTPTIME=1646388900782,Realtime=5228570,Certainty=37
NTP服务器 2: isSuccess=true,NTPTIME=1646388902841,Realtime=5230642,Certainty=13
NTP服务器 3: isSuccess=true,NTPTIME=1646388905114,Realtime=5232914,Certainty=114
NTP服务器 4: isSuccess=true,NTPTIME=1646388907175,Realtime=5234976,Certainty=10
NTP服务器 5: isSuccess=true,NTPTIME=1646388909204,Realtime=5237005,Certainty=12
NTP服务器已修复，可以重启机器试试是否正常获取时间
```

NOTE

What does it mean about Zidoo Media players' out-of-sync? That's to say, Zidoo media players cannot access the the NTP time server. If the time is not synchronized due to the router or VPN, and the tutorial above cannot fix it, please try to whitelist the Zidoo NTP time server.

Zidoo Player NTP Time Server Address: **2.android.pool.ntp.org**
