

Chrome Browser – Customize and Control

The power of the Chrome Browser can be enhanced when visiting the browser's settings. Click on the Customize and Control menu in the top right corner of the browser. Keyboard shortcuts are also listed in the menu for the options below. The Browser on a Chromebook is almost identical to the Chrome Browser on traditional desktops and laptops.

Customize and Control	Description
New Tab and Windows	Click on these options to open a new tab or window in the browser
History	Hover over History to view the browser's history and chrome tabs open on other devices. Click here to learn how to sync Chrome data.
Bookmarks	Hover over Bookmarks to see a list of your current Bookmarks and access the Bookmark manager. Click here to learn how to manage your Bookmarks.
Zoom	Use the zooming options to zoom in and out on your screen and also enter full screen mode of the browser.
More Tools	Hover over More Tools to save web pages, add pages to your Shelf for quick access, clear browsing data, manage extensions, and take a screenshot.
Settings	Access Chrome Browser's Settings
