Draft Program for visit to KTH in framework of eCampus project

The eCAMPUS project is a four-year national and structural reform initiative co-funded by the ERASMUS+ CBHE programme of the European Union. The project aims to enhance the quality of digital teaching & learning (T&L) in Armenian universities through multiple strategic initiatives. These include developing teaching staff's digital skills, implementing internal QA mechanisms for digital T&L, establishing adequate digital educational ecosystems with model infrastructure, introducing innovative educational practices, and creating a supportive regulatory framework.

Visiting institutions:

Armenian institutions

Yerevan State University (YSU)

Armenian State Pedagogical University After Khachatur Abovyan (ASPU)

Yerevan State Medical University After Mkhitar Heratsi (YSMU)

Northern University (NU)

Institute for Informatics and Automation Problems of the NAS of the RA (IIAP NAS)

National Center for Professional Education Quality Assurance Foundation (ANQA)

Ministry of Education, Science, Culture and Sport of the RA (MESCS)

European institutions

Universidad Autónoma de Madrid (UAM), Spain

Universidade de Lisboa (ULISBOA), Portugal

Universita Degli Studi di Genova (UNIGE), Italy

Contact persons KTH: Victor Kordas victork@kth.se, Elizabeth Keller, ekeller@kth.se

Date of visit: October 15-16 2025

Approximate number of participants: 20

Most participants are teachers and quality officers

**Co-funded by
the European Union**

Background and goal for the visit: The 2-day visit is part of the WP3 work within the eCampus project. The goal of this work package is to develop an internal quality assurance (IQA) system for digital TLA (teaching and Learning Activities) in Armenian Higher Education Institutions (IQAsys). This system is crucial for maintaining high standards in digital education. It provides a structured approach to evaluation, self-assessment, and continuous enhancement of educational quality. By aligning with the European Higher Education Area's quality assurance standards, it ensures that digital TLA practices are consistent and reliable, fostering trust and credibility in online education.

Topics of special interest are:

1. Digital technologies in higher education
2. Assessment of, for and as learning (role assessment in learning)
3. Quality assurance on institutional level: stakeholders, tools, methodologies
4. Cooperation with students (students as partners in education)
