

Hackathon by the Sea

A hackathon is a collaborative event focused on innovative problem-solving, where high school students convene to ideate and develop technological solutions within a condensed timeframe, in our case, 24 hours. The essence of the event is to harness creativity and technical skills to produce cutting-edge projects in an accelerated environment.

We are committed to creating an inspiring and innovative environment for all. Our event is founded on the principles of inclusivity, respect, and collaboration. We expect all participants to help us ensure a safe and positive experience for everyone, irrespective of gender, identity, age, experience, or background.
