Objective:

Experienced construction safety officer with over 10 years of comprehensive experience in developing and implementing safety programs to ensure compliance with OSHA regulations and mitigate risks on construction sites. Seeking a challenging position to utilize my expertise in promoting a safe working environment and minimizing workplace accidents.

Summary of Qualifications:

- Proficient in conducting safety inspections, risk assessments, and audits to identify hazards and implement corrective actions.
- Skilled in developing and delivering safety training programs for employees and contractors to enhance awareness and compliance with safety standards.
- Strong knowledge of federal, state, and local safety regulations, including OSHA guidelines, NFPA codes, and ANSI standards.
- Demonstrated ability to investigate incidents, analyze root causes, and develop preventive measures to reduce the likelihood of recurrence.
- Excellent communication and interpersonal skills, with the ability to interact effectively with personnel at all levels within an organization.

Professional Experience:

Construction Safety Officer

ABC Construction Company, City, State

March 2010 - Present

- Lead the development and implementation of a comprehensive safety program for a variety of construction projects, including commercial buildings, infrastructure projects, and residential developments.
- Conduct regular site inspections to identify potential safety hazards and ensure compliance with safety regulations and company policies.
- Evaluate contractor safety programs and performance to ensure alignment with project safety goals and objectives.
- Provide safety training to employees and subcontractors on topics such as fall protection, confined space entry, electrical safety, and hazard recognition.
- Investigate incidents and near-misses to identify root causes and prevent recurrence through corrective actions and process improvements.
- Maintain accurate safety records and documentation to track compliance, incidents, and corrective actions.
- Collaborate with project managers, superintendents, and subcontractors to promote a culture of safety and enhance safety performance on construction sites.

Safety Coordinator

XYZ Engineering Services, City, State

June 2006 - February 2010

- Assisted in the development and implementation of safety policies and procedures for engineering projects, including plant expansions, equipment installations, and facility upgrades.
- Conducted safety inspections and audits to identify deficiencies and recommended corrective actions to minimize risks and improve safety performance.
- Facilitated safety training sessions for employees on topics such as hazard communication, personal protective equipment, and emergency response procedures.
- Reviewed contractor safety plans and work permits to ensure alignment with company safety standards and regulatory requirements.
- Participated in incident investigations and root cause analyses to identify trends and implement preventive measures.
- Prepared reports and presentations on safety performance and trends for management review and decision-making.
