2.4		
34.	A. Measurable	place your goals and sub-goals within time frames?  C. Relevant
25	B. Specific	D. Time-bounded
33.	Which refers to a goal that require	
	A. High goals	C. Low goals
2.6	B. Long-term goals	D. Short-term goals
		break down your main objective into smaller sub-goals and
result is v	within the parameters of your ability	•
	A. Achievable	C. Specific
	B. Measurable	D. Relevant
37.	What does letter R in the acronyi	
	A. Random	C. Rest
	B. Rapid	D. Relevant
38.	What is a basic skill in baseball/s	softball which is related to throwing?
	A. catching	C. hitting
	B. gripping	D. running
39.	What do you call of the referee in	n baseball/softball game?
	A. coach	C. time keeper
	B. tournament manager	D. umpire
40.	Which of the following is the ele	ment of throwing?
	A. catching	C. shooting
	B. hitting	D. wind-up
41.	What offensive skill used to strik	te the pitched ball using a bat?
	A. catching	C. pitching
	B. hitting	D. throwing
42.	What year does softball and base	ball voted drop as an Olympic sport?
	A. 2012	C. 2016
	B. 2010	D. 1999
43.	What do call of an extra inning be	eing played to break the tie?
	A. undertime	C. overtime
	B. playing time	D. extra time
44		ces a regular player with a substitute?
	A. on bat	C. on deck
	B. On hole	D. Substitutions

A. AH1N1 C. leptospirosis B. avian Influenza D. SARS 56. Which refers to a habit when a sick person should wear mask?  A. Washing hand regularly B. Handle and prepare food safely	45	. It is a team sports played by two	teams, each made up of 9 players.
### HEALTH  ### 46. Estimates the frequency of a diseases in a defined population during a specified time.  A. birth rate B. crude death rate D. morbidity rate 47. Estimates the frequency of occurrence of death in a defined population during a specified time.  A. birth rate C. morbidity rate B. crude death rate D. mortality rate B. crude death rate D. mortality rate 48. Which is NOT part of the top five (5) leading causes of mortality according to 2018  Philippine Health Statistics? A. accident C. pneumonia B. Ischemic heart disease D. malignant neoplasm 49. Which of the following is TRUE regarding the nature of mortality and morbidity in the Philippines as of 2018? A. The leading cause of both mortality and morbidity is a communicable disease. B. The leading cause of both mortality and morbidity is a non-communicable disease. C. The leading cause of morbidity is a coidents.  50. All of the following clinical terms are translated correctly in layman's term, EXCEPT: A. Cerebrovascular disease: Heart attack C. Anemia: Low blood pressure D. Malignant Neoplasm: Cancer 51. How does Human Immunodeficiency Virus (HIV) infection be transmitted? A. by kissing C. by holding hands B sharing utensils D. none of the above 52. Which of the following is an airborne disease caused by mycotacterium? A. Before and after eating C. Sexually Transmitted Infections (STI) B. Pneumonia D. Tuberculosis (TB) 53. When is handwashing recommended? A. Before and after eating C. After sneezing and /or coughing B. After using the bathroom D. All of the above 54. Which of the following diseases is commonly spread by the feces – to – mouth route and inhalation of virus? A. AHINI C. foot and mouth disease D. SARS 66. Which refers to a habit when a sick person should wear mask? A. Washing hand regularly B. Handle and prepare food safely		A. Volleyball	C. Sepak takraw
46. Estimates the frequency of a diseases in a defined population during a specified time.  A. birth rate B. crude death rate D. morbidity rate 47. Estimates the frequency of occurrence of death in a defined population during a specified time.  A. birth rate C. morbidity rate B. crude death rate D. mortality rate B. crude death rate D. mortality rate 48. Which is NOT part of the top five (5) leading causes of mortality according to 2018 Philippine Health Statistics A. accident C. pneumonia B. Ischemic heart disease D. malignant neoplasm 49. Which of the following is TRUE regarding the nature of mortality and morbidity in the Philippines as of 2018? A. The leading cause of both mortality and morbidity is a communicable disease. B. The leading cause of both mortality and morbidity is a non-communicable disease. C. The leading cause of morbidity is a coicdents. 50. All of the following clinical terms are translated correctly in layman's term, EXCEPT: A. Cerebrovascular disease: Stroke B. Ischemic heart disease: Heart attack C. Anemia: Low blood pressure D. Malignant Neoplasm: Cancer 51. How does Human Immunodeficiency Virus (HIV) infection be transmitted? A. by kissing C. by holding hands B sharing utensils D. none of the above 52. Which of the following is an airborne disease caused by mycotacterium? A. Bronchitis C. Sexually Transmitted Infections (STI) B. Pneumonia D. Tuberculosis (TB) 53. When is handwashing recommended? A. Before and after eating C. After sneezing and /or coughing B. After using the bathroom D. All of the above 54. Which of the following diseases is commonly spread by the feces – to – mouth route and inhalation of virus? A. AHINI C. foot and mouth disease 55. Which of the following is caused by spirochete bacteria known as Leptospira Interrogans? A. AHINI C. leptospirosis B. avian Influenza D. SARS 56. Which refers to a habit when a sick person should wear mask? A. Washing hand regularly B. Handle and prepare food safely		B. Baseball/softball	D. Basketball
A. birth rate B. crude death rate D. morbidity rate 47. Estimates the frequency of occurrence of death in a defined population during a specified time.  A. birth rate C. morbidity rate B. crude death rate D. mortality rate B. crude death rate D. mortality rate 48. Which is NOT part of the top five (5) leading causes of mortality according to 2018 Philippine Health Statistics? A. accident C. pneumonia B. Ischemic heart disease D. malignant neoplasm 49. Which of the following is TRUE regarding the nature of mortality and morbidity in the Philippines as of 2018? A. The leading cause of both mortality and morbidity is a communicable disease. B. The leading cause of mortality is a non-communicable disease. C. The leading cause of mortality is a non-communicable disease. D. The leading cause of morbidity is a coidents.  50. All of the following clinical terms are translated correctly in layman's term, EXCEPT: A. Cerebrovascular disease: Stroke B. Ischemic heart disease: Heart attack C. Anemia: Low blood pressure D. Malignant Neoplasm: Cancer 51. How does Human Immunodeficiency Virus (HIV) infection be transmitted? A. by kissing C. by holding hands B sharing utensils D. none of the above 52. Which of the following is an airborne disease caused by mycotacterium? A. Bronchitis C. Sexually Transmitted Infections (STI) B. Pneumonia D. Tuberculosis (TB) 53. When is handwashing recommended? A. Before and after eating C. After sneezing and /or coughing B. After using the bathroom D. All of the above 54. Which of the following diseases is commonly spread by the feces – to – mouth route and inhalation of virus? A. AHINI C. foot and mouth disease D. leptospirosis 55. Which of the following is caused by spirochete bacteria known as Leptospira Interrogans? A. AHINI C. leptospirosis 56. Which refers to a habit when a sick person should wear mask? A. Washing hand regularly B. Handle and prepare food safely	HEALT	н	
B. crude death rate  47. Estimates the frequency of occurrence of death in a defined population during a specified time.  A. birth rate  C. morbidity rate  B. crude death rate  D. mortality rate  48. Which is NOT part of the top five (5) leading causes of mortality according to 2018  Philippine Health Statistics?  A. accident  C. pneumonia  B. Ischemic heart disease  D. malignant neoplasm  49. Which of the following is TRUE regarding the nature of mortality and morbidity in the Philippines as of 2018?  A. The leading cause of both mortality and morbidity is a communicable disease.  B. The leading cause of both mortality and morbidity is a non-communicable disease.  C. The leading cause of mortality is a non-communicable disease.  D. The leading cause of mortality is a non-communicable disease.  A. Cerebrovascular disease: Stroke  B. Ischemic heart disease: Stroke  B. Ischemic heart disease: Heart attack  C. Anemia: Low blood pressure  D. Malignant Neoplasm: Cancer  51. How does Human Immunodeficiency Virus (HIV) infection be transmitted?  A. by kissing  C. by holding hands  B sharing utensils  D. none of the above  52. Which of the following is an airborne disease caused by mycotacterium?  A. Bronchitis  C. Sexually Transmitted Infections (STI)  B. Pneumonia  D. Tuberculosis (TB)  53. When is handwashing recommended?  A. Before and after eating  B. After using the bathroom  D. All of the above  54. Which of the following diseases is commonly spread by the feces – to – mouth route and inhalation of virus?  A. AH1N1  C. foot and mouth disease  D. SARS  Mohich refers to a habit when a sick person should wear mask?  A. Washing hand regularly  B. Handle and prepare food safely	46	. Estimates the frequency of a dise	ases in a defined population during a specified time.
47. Estimates the frequency of occurrence of death in a defined population during a specified time.  A. birth rate B. crude death rate D. mortality rate 48. Which is NOT part of the top five (5) leading causes of mortality according to 2018  Philippine Health Statistics? A. accident C. pneumonia B. Ischemic heart disease D. malignant neoplasm  49. Which of the following is TRUE regarding the nature of mortality and morbidity in the Philippines as of 2018? A. The leading cause of both mortality and morbidity is a communicable disease. B. The leading cause of both mortality and morbidity is a non-communicable disease. C. The leading cause of mortality is a non-communicable disease. D. The leading cause of mortility is a cidents.  50. All of the following clinical terms are translated correctly in layman's term, EXCEPT: A. Cerebrovascular disease: Stroke B. Ischemic heart disease: Stroke B. Ischemic heart disease: Heart attack C. Anemia: Low blood pressure D. Malignant Neoplasm: Cancer  51. How does Human Immunodeficiency Virus (HIV) infection be transmitted? A. by kissing C. by holding hands B sharing utensils D. none of the above  52. Which of the following is an airborne disease caused by mycotacterium? A. Bronchitis C. Sexually Transmitted Infections (STI) B. Pneumonia D. Tuberculosis (TB)  53. When is handwashing recommended? A. Before and after cating C. After sneezing and /or coughing B. After using the bathroom D. All of the above  54. Which of the following diseases is commonly spread by the feces – to – mouth route and inhalation of virus? A. AHIN1 C. foot and mouth disease D. Eptospirosis B. avian Influenza D. SARS  55. Which of the following is caused by spirochete bacteria known as Leptospira Interrogans? A. Washing hand regularly B. Handle and prepare food safely		A. birth rate	C. mortality rate
time.  A. birth rate B. crude death rate D. morbidity rate 48. Which is NOT part of the top five (5) leading causes of mortality according to 2018  Philippine Health Statistics? A. accident B. Ischemic heart disease D. malignant neoplasm 49. Which of the following is TRUE regarding the nature of mortality and morbidity in the Philippines as of 2018? A. The leading cause of both mortality and morbidity is a communicable disease. B. The leading cause of both mortality and morbidity is a non-communicable disease. C. The leading cause of morbidity is accidents. D. The leading cause of morbidity is accidents.  50. All of the following clinical terms are translated correctly in layman's term, EXCEPT: A. Cerebrovascular disease: Stroke B. Ischemic heart disease: Heart attack C. Anemia: Low blood pressure D. Malignant Neoplasm: Cancer  51. How does Human Immunodeficiency Virus (HIV) infection be transmitted? A. by kissing C. by holding hands B sharing utensils D. none of the above  52.
