

X Men Dark Phoenix Review

What I liked about the movie:

- I enjoyed how the phoenix was handled. In previous media it hasn't always been handled well.
- Most of the performances were good.

What I didn't like about the movie:

- I didn't care for the main antagonist in this film and thought it wasn't handled very well.
- Direction of the film. Many scenes were not shot in interesting ways and it shows this was a first time director.

Overall thoughts:

I have been really attached to the x-men series. They were always my favorite comic characters and so i think this adds bias to my opinion of the movie. As a result I can say that I enjoyed this movie more than Avengers Endgame but I will concede that Avengers Endgame is the better movie. The plot is pretty straight forward and because I've been attached to these characters for years I enjoyed seeing how they ended up. This movie as a fitting end to this version of the x men. However the antagonist was just added with very little explanation and it shows. The third act is the worst part of the movie. Now I look forward to how the xmen will be added to the MCU.

Rating: 6/10
