

W3C Font and Text Community Group

The *Font and Text Community Group* (FTCG) gathers individuals and organizations interested in discussing and developing specifications and implementations for technologies which operate on and at the interface between text encoding and font formats. Examples of such technologies are shaping engines and text layout applications.

Join the FTCG: www.w3.org/community/font-text

- We use the [GitHub repository's issues system](#) to discuss all sorts of topics (font and text's encoding, format, shaping, layout, etc, you get the idea). You *don't* have to be a [formal FTCG participant](#) to join the discussions.
- The [public mailing list](#) is reserved for announcements, meeting minutes, and other archival purposes.

This document will be deprecated once we've set up a reliable approach for making **announcements**:

- 8 Oct: Meeting 4 has been scheduled for Mon 19 Oct, 16:00–17:30 UTC.
 - See the [GitHub issue](#) for details.
- 24 Aug: The Font and Text Community Group has been created.

Proposals

Submit your proposals as [issues in our GitHub repo](#). Proposals collected earlier in this document have been migrated to [issue #9](#).

Meeting 4

Upcoming. See the schedule and agenda: <https://github.com/w3c/font-text-cg/issues/17>

Meeting 3

Minutes available at <https://w3c.github.io/font-text-cg/minutes/meeting-20200921-3>

Meeting 2

Minutes available at <https://w3c.github.io/font-text-cg/minutes/meeting-20200824-2>

Meeting 1 (Pre-W3C ad hoc)

Minutes available at <https://w3c.github.io/font-text-cg/minutes/meeting-20200727-1>
