

Part 3: Enhances the Lesson

The Arkansas State Flag

In the previous PowerPoint project, I created a lesson on the Arkansas symbols. Throughout that lesson we talked and learned about many different symbols and their significance. This video will enhance the learning as we talk about the specifics of the Arkansas state flag. The video shown will provide information on the 25 white stars as well as the other 4 blue stars in the middle. Students will learn what those stars represent and a little more on the background. Students will answer a few questions after watching the video and being read a small paragraph. After this video students will either complete the printed out color worksheet of the flag or the puzzle on Kidtopia. This video would be extremely helpful when teaching my students about this social studies standard.
