

Hey [name] 🙌,

I recently found your Instagram profile and I have to say I was genuinely impressed with the quality of your work. Specifically, your videos on making money —unlike other influencers, you actually give a clear path and you direct people to the right place.

However, I believe there's a fantastic opportunity for your digital marketing revenue to be expanded and your time saved. I have built an AI demo in the fitness niche, but I can tailor this to you. The AI will capture leads, making it easier for you to make money without stressing about learning different ways of expanding your funnels. Here is a sample of what I can do: (the password is unlocked123\$) [my link]

After your leads are captured, I will write your emails to push even more people to buy your products/services. I will work to gain some experience. Initially, in return, all I ask for is a testimonial. I'd like to invite you to be a part of a technological revolution currently happening in the digital marketing niche. Could we discuss this further via email or a quick DM?

P.S. I can also make the AI lead generation a customer support build if you prefer.

Best of success,
Adonis Antanov
