

## **Project Synopsis**

### **Title of Project:**

Website for Jig & Fixture Manufacturing Company Pune

### **Project Team:**

Mayuri Madhukar More (TYBBA(CA), 193072)

Vaishanavi Kishor Kadukar (TYBBA(CA), 193072)

### **Problem Statement:**

Jig and Fixture Manufacturing company manufacture various products. They don't have their website. The company wants to go publicly through the internet with our website project. The company physically located at Pune location but now with our system company will be visible to all their clients on the internet virtually. The clients of company physically visit to company and place orders for the specific products but our website helps to company to view products virtually and place the orders. So clients can save their time and man power and also save extra expenditure of travelling.

### **Introduction:**

Jig and Fixture manufacturing is a company which manufactures hydraulic HMC VMC, heavy welding fixture and all type of machinery parts. This website provides facility of supplying manufactured parts to the various company or to stores. The website gives all detail informations about the products which company manufactures. Company information, Company location, Company manufacturing information, samples of all products etc.

**Objectives:**

1. To design user friendly website
2. To provide all detail views of company products to the users
3. To give the detail information about all the clients and suppliers
4. To supply the products to various companies
