

CANVAS MASTERY PATHS CHECKLIST

ENABLE MASTERY PATHS

- ☐ Enable M.P. in course settings (only once for a course)

M.P. PLANNING

- ☐ Start with the end in mind. Consider creating a Post Assessment if appropriate
- ☐ Roughly plan M.P. using template (paper templates make building in Canvas easier)
- ☐ Consider if any pathways will have choices ***ADVANCED MASTERY PATH USERS!!!
- ☐ Strategically name each conditional item (Ex: TEK Number or Unit/Lesson Number FIRST)

M.P. SETUP and CREATION

- ☐ Create a module to house M.P. content
- ☐ Create GRADED Pathfinder (**quiz**/assignment/discussion) that will send students down varied pathways based on their score. Assignment/Discussion requires teacher grading first.
***Currently, classic quiz is easier to see who is assigned to which pathway.
- ☐ Pathfinder needs to be assigned to EVERYONE
- ☐ Create content for each pathway and strategically place it in the module. Consider naming conditional items with a TEK/Lesson # name + pathway label such as (A) (B1) (B2) (C), Colors  or Icons 
- ☐ The module order drives the sequence, not the configuration page. Each pathway's conditional items must flow DOWN the module in order.
- ☐ Consider using different indentations for each pathway for organization.
- ☐ Each PAGE in Pathway has been checked to "Allow in Mastery Path"
- ☐ Each QUIZ (*minus the pathfinder*) has been assigned to "Mastery Path" and NOT to "Everyone"
- ☐ Each ASSIGNMENT has been assigned to "Mastery Path" and NOT to "Everyone"
- ☐ Each DISCUSSION has been set to graded and assigned to "Mastery Path" and NOT to "Everyone." Scoring can be set to 0 if not being graded
- ☐ If any pathway has choices, duplicate any conditional item that is used in both choices. An item can only be used once per pathway.
- ☐ If using Prerequisites such as "Complete All Items" click 3 dots in the Module heading, select edit, and set your Requirements.
- ☐ **Verify that the Pathfinder is assigned to "Everyone"**
- ☐ Configure your pathways by clicking "Mastery Path" on the Pathfinder. Consider clicking the items in the correct order that you want students to work through them. However, the order is not critical here.
- ☐ **Double check that all items for each pathway flow DOWN the module in order. Order matters here!**
- ☐ Check your score values for each pathway. Change if needed.
- ☐ When finished, test pathway in "Student View" - Please note that any conditional item that was assigned to "test" as well as "Mastery Path" will be accessible in student view for the teacher, but should not show up on student end.
