

Approving a YouTube Video

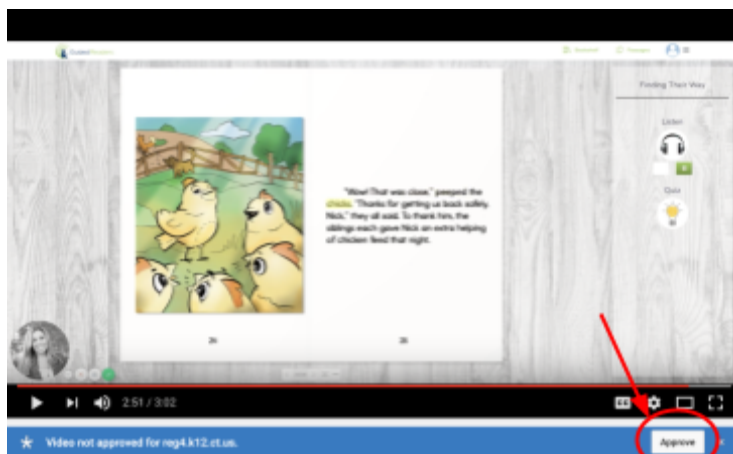

In our district, we have YouTube closed as much as we can. Most videos need to be approved before the students can watch them on their Chromebooks or even in a chrome browser that they are signed into.

Please follow the steps below to approve videos. Only teachers have this access.

1. If the video is embedded in a web page
 - a. Click on play
 - b. Once it starts to play, click on the YouTube words on the right

2. The YouTube web page will open with the video you need to approve.
3. Under the video is an approve button. You need to click on the approve

4. Once you hit approve the videos will play on the students Chrome environment
