Shortest Code 4 Challenge

1. Write a method to pick all the flowers.
2. The only code in the **main section** should be to create the Jeroos and then call a method for one of the Jeroos.

3. Pick your own criteria to solve the puzzle. Use the ***fewest lines??? or fewest characters??? or shortest path???*** of code in your Jeroo Methods section. I will judge the top 25% of the submissions and they will get an extra 20% added onto a quiz. All other reasonable solutions will get an extra 10% added on a quiz.
