

# Solana Ecosystem Call IRL Feedback

I have the IRL event in Vadodara, here is the POAP:

- In an IRL watch party, where 20-30 people are present - the sound system should be clear and people shouldn't be talking to each other during streaming.

In my case, I attended the event, met people and watched the ecosystem call again at home

- There are many first timers attending these events as plus one, there should be a 2 minutes short intro of Solana or Superteam for these people.
- We can have some talks/workshop in IRL before the Ecosystem for engagement
- Can we do the ecosystem call on weekends? it can increase the people attending the IRL events
- At our event, people were very curious about Superteam. How can one become a member? There should be some intro of superteam and membership.
