

Mission Statement:

The Reproductive Health PNHP (Physicians for a National Health Program) Member Interest Group believes that a universal single-payer system and reproductive justice are inextricably linked, and are both necessary in the pursuit of health justice and equity.

Goals:

This intersectional and intergenerational base intends to advance ACOG (American College of Obstetrics and Gynecology) and other societies' stance on universal health care reform and empower leaders to fight for their patients and communities through resolution campaigns and fighting profit-focused influences.

Winning these projects requires coordination across all stages of medical training to build a base among medical students, residents, organized physicians, and allied organizations.
