

Typingagent |

Dear Parent/Guardian:

Kimberly second graders will be exposed to proper keyboarding technique and finger placement using a program called Typing Agent. The expectation for second grade students is to key one to two sentences independently by the end of the school year.

Typing Agent is a web-based program which means your student can log on to the program from both school and home. This access allows your student to continue to practice keyboarding from home via an internet ready computer or laptop with a keyboard.

In today's digital age, teaching students to touch type is imperative. As students become keyboard proficient, this invaluable skill will help them succeed in their school years and will be critical as they pursue further studies, training, or move directly into the workforce.

Sincerely,

Second Grade Teachers
