

University Schools			
Monitoring: Review: Annually, March	Descriptor Term: Admissions	Descriptor Code: 6.2031	Issued Date: June 2025
		Rescinds: 200	Issued:

As an Innovative School District, our schools are unique in nature. It is important for students and families to understand this unique structure and determine if a University School education is in the best interest of the student and supported by the family. Each year, public informational sessions are conducted to explain these unique elements which include the schedule, calendar, academic model, and overall approach to education. The purpose of all admissions and enrollment policies is to establish guidelines for application, admission, and continuing enrollment. These policies apply to any prospective or current University Schools student and their parent or legal guardians.

University Schools are schools of choice and are committed to an open, non-discriminatory admissions process. These policies are developed to ensure clarity in the admissions process and fairness to all applicants.
