COMMUNITY PLEDGE: UNIFIED EFFORT TO ELIMINATE VIOLENT CRIME, Empowering Youth & Mentor Organizations with Tech Ownership and Financial Sustainability: uChatYes Launches Revolutionary AI Platform

Dallas-Fort Worth, TX - Today, a Unified Community announces the launch of the Community Pledge, a collective commitment to address and eliminate violent crimes while supporting local businesses through community-to-business accountability. We pledge to report crime. In conjunction with this initiative, uChatYes, a pioneering youth and Nubian entity, proudly introduces their revolutionary AI platform, uChatYes.com, aimed at providing tech ownership and financial sustainability to the youth in the Dallas-Fort Worth (DFW) area.

Our objective is to brand each business by giving away 1000 plus giveaways each day to the community. [For less than \\$25 dollars a week, the community will brand you daily via social media.](#) It's our community to business collaboration #WhyNot accountability campaign. Let us know what you want to give away and each month the sponsored giveaway will be on behalf of your business.

[The Community Pledge](#) represents a united effort to eradicate various forms of violence, including violent crimes, gang violence, sexual crimes, domestic abuse, and more. By standing united against violence and actively reporting wrongdoing, the community aims to create safer and more prosperous neighborhoods. The Community Pledge also emphasizes the importance of supporting local businesses and promoting community-to-business accountability through a partnership with VBS, a unique platform offering comprehensive branding solutions tailored to each business's budget.

The [uChatYes AI platform](#) revolutionizes the way youth starting in the DFW area can engage with technology. Through the ownership and marketing of their own version of Chatgpt AI, youth aged 12 and above, along with their mentors, can generate substantial monthly income as community partners. uChatYes firmly believes that membership tech platforms equal "WEALTH," empowering young entrepreneurs to thrive financially and reduce their reliance on conventional 9-5 job structures and grants.

As more community members and business owners register on uChatYes and other [AI marketing platforms](#), the potential for earnings increases for both mentors, students, and families. This initiative is not solely about financial empowerment; it is about creating a united community that supports the growth and success of its youth. By providing financial resources, tools, and support, VBS aims to reduce crime, bullying, and peer pressure while fostering teamwork, trust, and fun.

The uChatYes platform emphasizes accountability, paid online learning, and community support. By engaging with AI technology and participating in structured activities, youth have the opportunity to spend their free time productively, reducing the likelihood of engaging in harmful activities. This initiative enables local organizations to take control of the narrative in their respective cities, leading to a brighter and more prosperous future for all.

"At uChatYes, we firmly believe that technology owned by the community is the key to solving community issues," said the spokesperson for uChatYes. "By empowering our youth with AI platforms and financial sustainability, we are equipping them with the tools they need to thrive in an ever-evolving world. We are reimagining AI platforms and utilizing the generated profits to empower communities with the collective support of communities throughout the nation. Together, we can shape a better future for now and the next generation."

With AI projected to replace over 300 millions jobs by 2030, uChatYes.com aims to create sustainability through technology, providing an alternative to traditional job structures. Their mission is to empower one city at a time, starting with the vibrant community in DFW.

To support this transformative initiative and join the uChatYes community, please visit uChatYes.com. Membership costs for uChatYes range from Free to \$16.99 per month, offering an affordable and life-changing alternative to existing Chatgpt platforms priced at \$20.
