

SUBtext Excluded Books

SUBtext does not accept the following books for 5 main reasons:

- 1) The textbook edition is far outdated for the courses being taught. We do accept older editions of most textbooks, but unfortunately, some versions are too different from the current course material and would be detrimental to student learning. **Generally, we take the current edition and one edition previous.** A key exception to this is that **we only accept the most recent edition of publication/citation manuals.** These manuals reflect acceptable publication/citation standards, which change with each update.
- 2) The new version of the textbook comes with a digital access code that is crucial to the course. Oftentimes, the textbook publisher sells the online access code for close to the price of the new textbook and code together, meaning that reselling just the textbook doesn't actually save students money. In this case, we will compare what the code alone costs vs the code and book bundle at the bookstore. **We will not sell your book for a price that would put the online code plus your book at or above the price of a new bundle from the Campus Bookstore if your book is being used for a class that requires the access code.**
- 3) Course packs that are specific to individual classes frequently get updated / switch readings, making most of the course pack useless for future classes. **If a course pack has a course number and date, then we probably won't take it.**
- 4) The book is available for free online.
- 5) The book was published ten or more years ago, and is deemed outdated. We do accept novels or general reading that is older, or select textbooks that are still being taught.

Other books can be refused for any other reason at the discretion of SUBtext supervisors and management.

The books on this list are common books we do not take. There may be others not on this list that we unfortunately cannot take.

PLEASE NOTE: We are currently NOT accepting biographies, unless they are being used for a class. This is due to limited shelf space.
