# Bridge Failure Report

## A closer inspection

---

### Introduction

Write an introduction that covers your team members, the design aspects of your bridge, and the materials that were used to create it.

### Failure

Write a few sentences on the failure that occurred and if it was a material failure or a weld failure.

---

---

Mention as well the maximum weight your bridge held.

Insert any pictures if you would like to.

### **Moving Forward**

Discuss how this failure could be avoided if you were to construct it again. Discuss what you have learned from the type of failure.
