

STEM

PAPER PLATE ROLLER COASTER

Possible Materials:

Paper plates, cups of different heights, tape, paper towel or toilet paper tubes, marble, any recycled materials you have.

Directions:

1. Construct a roller coaster that will carry a marble from the top to the bottom.
2. See picture for an example of how to cut your paper plate so the marble stays on the track.
4. Create, try it out, and make adjustments if necessary.
