Court's Obstruction With Justice

I know the court, the plaintiffs and their counsel are fully aware that I planned on coming in today with both proof that every word I've said inside and outside of that courtroom is true, and conversely, everything stated on the plaintiffs side has been false. Their false misrepresentationers and a desperate tactic to circumvent the consequences of their crimes, which I have additional irrefutable proof on on top of what is easily proven in my truck ,broed, which everyone is in possession of. Why this court has obstructed justice once again and assigned me counsel, after first denying to me until counsel until I agreed to step into the Judge's and his court reporter's collusive effort to illegally incarcerate me.

adjourn. why an attorney I didn't ask for was assigned to me without my asking, and after having expressed my intentions to end this frivolous and abusive case today. This seems to be another intentional delay tactic by the guilty, and possibly this court.

I could be wrong. There is more than enough evidence in my trial brief to recognize this case as the abuse of the systemen it is, and maybe the court's intent is to dismiss it today. I don't know.

What I do know is after what the Judge and his reported pulled the last time I walked into his courtroom voluntarily. I'm sure the court will have no problem allowing me to attend via zoom.

If the court has other plans I'm unaware of against me that require my attendance, I'll appear in the courtroom.

If the court's intent was to entrap me again, I'll show up so you can do it, as I have this entire

case. In full disclosure though, if my presence isn't
3:30  ent over zoom I'm not walking into that courtroom with peoploe I trust who have jurisdiction over the county.
