

Changelog Beta-3:

- Fixed app icon not showing in taskbar. (*Minimization* problem fixed*)
- **Synchronisation** problem fixed.
- Various minor bug fixes.
- **New Features:**
 - send to multiple recipients at once (*limit:50 addresses per transaction*)
 - Introducing “**Add peer**” button ⇒ check **settings**
 - Introducing “**remote node**” feature (you don’t need to download the blockchain anymore) ⇒ check **settings**
 - (**Exclusive**) Introducing multiple **color themes** to choose from. ⇒ check **settings**
 - Added “**Create a view only wallet**”
 - Introducing “**Address Book**” for saving your Recipients addresses (just like contacts)
 - For opening or creating a new wallet you don’t need to restart the wallet client anymore.
 - By default, wallet client will now open previously opened wallet at startup.
 - Some minor changes to the layout.
- Some **Remote Nodes:**
 - Eu.edollar.world:33031
 - 92.222.70.207:33031

Changelog Beta-2:

- Synchronization status bar visibility fixed*
- Received transaction history fixed*
- Balance not showing for some wallets fixed* (not tested)
- And some other small bug fixed*

Please NO**te:** All future transactions will be recorded in history but if you don’t see any previous transaction history then you’ll have to reset your wallet database and have to resync your wallet from the start.[*To reset your wallet database delete this folder “C:\ProgramData\edollar”*]
