

Paper Title (Please provide up to 20 word title that should be concise and informative. FONT Times New Roman, Bold, Justify, Size 14pt, each first letter capitalized.)

Author Name¹, Author Name^{2*}, Author Name³, Author Name⁴, Author Name⁵ (Font size 11pt)

^{1,2}Faculty, Study Programs, Institutions, Cities, Countries

Email: ¹Author, ^{2*}Author, ³Author, ⁴Author, ⁵Author

(^{*}Email Corresponding Author: email@email.com) (Times New Roman, Font Size 10pt)

ABSTRAK

Abstrak merupakan ringkasan singkat dari makalah untuk membantu pembaca cepat memastikan masalah utama penelitian, solusi dari penyelesaian masalah yang ditemui, tujuan penelitian serta hasil sementara penelitian yang bisa berupa angka/persentase sesuai dengan kebutuhan penelitian. Abstrak harus jelas dan informatif, memberikan pernyataan untuk masalah yang diteliti serta solusinya. Panjang abstrak antara 150 hingga 250 kata. Hindari singkatan yang tidak biasa dan definisikan semua simbol yang digunakan dalam abstrak. Menggunakan kata kunci yang terkait dengan topik penelitian direkomendasikan.

ABSTRACT

Abstract is a brief summary of the paper to help readers quickly determine the main research problem, solutions to solving problems encountered, research objectives and temporary research results which can be in the form of numbers/percentages according to research needs. Abstract should be clear and informative, providing a statement for the problem under study and its solution. Abstract length between 150 to 250 words. Avoid unusual abbreviations and define all symbols used in the abstract. Using keywords related to the research topic is recommended.

OPEN ACCESS

ARTICLE HISTORY

Received: yyyy-mm-dd

Accepted: yyyy-mm-dd

Published: yyyy-mm-dd

KEYWORDS:

Keywords are labels for your manuscript used for search and indexing. Use established or universally understood abbreviations, such as DNA. A minimum of 3 words and a maximum of 5 words or key phrases, separated by semicolons (;), for example: Education; Islamic Studies; Local Wisdom; Social Studies. Align left.

INTRODUCTION (Font Size 11pt)

The article is made into a 1-column page with A4 paper size. For Top Margin 2 cm, Left Margin 2 cm, Bottom Margin 2 cm, and Right Margin 2 cm. The manuscript is created using Microsoft Word, single space, 11 pt Times New Roman, and no more than 8-10 pages.

Please select the title of the article (maximum 20 words) with the least words that may be necessary to adequately describe the content. The introduction should describe the background of the research, the solutions offered and comparable related work. If there is a quote in the article, it is MANDATORY to use APA STYLE and so on by using the MENDELEY citation tool in APA format (Supiyandi & Mailok, 2025). Terms in foreign languages are written in italics. In the first paragraph, describe what is the problem in the research (in the form of a paragraph description), also describe what is expected to be the solution to the problem in your research. Next, describe related research that is similar to your research (at least 5) with an update of 5 years before, so that with this related research can emerge a GAP Analysis of the research you conducted (ARI & TAŞGIN, 2023).

At the end of the introduction, describe the goals of your research and the expectations you want to achieve from your research. It is recommended for the Author to use the following article structure: INTRODUCTION (min 700 words) – METHOD (min 500 words) – RESULT (min 1800 words) DISCUSSION (min 800 words) – CONCLUSION (min 200 words). A maximum of 8-10 pages of articles (Harimato et al., 2025).

METHOD

This section explains how research is conducted. The main materials of this section are (1) research design; (2) population and sample (research target); (3) data collection techniques and instrument development; (4) and data analysis techniques. For research that uses tools and materials, it is necessary to note the specifications of these tools and materials. The appliance specification describes the sophistication of the tools used, while the material specifications describe the types of materials used. Qualitative research such as classroom action research, ethnography, phenomenology, case studies, and others, need to be added the presence of researchers, research subjects, informants who help during the research as well as how to explore research data, the location and duration of the research as well as the description of the validity of the research results.

RESULT

This section can be divided into subheadings. It should provide a concise and precise description of the experimental results, their interpretation, and the conclusions of the experiment that can be drawn.

1.1. Subsection

1.2. Subsection

1.2.1. Subsubsection

1.2.2. Subsubsection

Numbered lists can be added as follows:

- (1) One
- (2) Two
- (3) Three

The text continues here.

All figures and tables should be cited in the main text as Figure 1, Table 1, etc.

Figure 1. Title of figure

(a)

(b)

Figure 2. This is a picture; The scheme follows the same format. If there are multiple panels, they should be listed as (a) A description of what is contained in the first panel; (b) A description of what is

contained in the second panel. Images should be placed in the main text close to the first time they are mentioned. Captions on a single line should be centered.

Table 1. This is a table. Tables should be placed in the main text close to the first time they are mentioned.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data

DISCUSSION

The author should discuss the results and how they can be interpreted from the perspective of previous studies and working hypotheses. The findings and their implications should be discussed in the broadest possible context. Future research directions can also be highlighted.

KESIMPULAN

This section contains conclusions that answer all the problems contained in the research. The content of the conclusion is not in the form of points, but in the form of paragraphs. The number of words in this section is **around 200 words**.

REFERENCES

References should only relate to the material you cite in your article (this is not a bibliography). References must be in the **American Psychological Association (APA) 7th Edition** and arranged in alphabetical order. Please do not include any abbreviations. Any additional references must be included in the Supplementary Reading section, with a total of **at least 15 references**. MUST use **MENDELEY**. And there must be a **DOI** for each cited article.
