Course:

Assignment & Date	Feedback Provided	Strategy or Action Taken	Feedback After Strategy Applied	Questions	Goals	Mastery Reached?
3/21 - sample assignment/entry	need to improve my level of analysis and ensure that my points of analysis are consistently arguable and not plot-based	reworked my analysis and made sure to ask myself questions about "is this obvious" "does this prove the argument in my thesis" as per my conversation with my teacher	analysis is getting stronger as it now relates more to the thesis, but there's still a bit too much plot. Getting closer, but need to make analysis more arguable	how do I know how much plot is appropriate and how do I avoid being too general in my analysis?	make ALL my points of analysis arguable, and ensure that it always relates to my thesis in an arguable way	still working on it- approaching the level I want to be at, but not there yet
