

Early Childhood Education Center

Thank you for your interest in the ECEC for the education of your child! The Early Childhood Education Center (ECEC) at Louisiana Tech University is a preschool learning laboratory for three- and four-year-old children and is an integral component of instructional programming in the School of Human Ecology. The center has achieved an “Excellent” rating from the Louisiana Department of Education and is considered one of the best child care centers in the state of Louisiana.

Family and Child Studies faculty recognize the interdependence of physical, intellectual, and personality development of children, and the center’s approach reflects an emphasis on developing intelligence in the context of social interaction and physical activity. The physical environment, daily schedule, and implementation of activities are planned to promote maximum independence in the children.

The ECEC is located on Tech’s campus. Class size is limited to 17 students. Tuition is \$580 for full day. Special rates apply for Louisiana Tech University employees. The center operates on the Tech calendar, and the school year spans mid-September to mid-May annually. The center schedule aligns with university holidays and quarter breaks. Parents of children attending the ECEC are welcomed and encouraged to visit the center to observe their children and/or participate in activities when desired.

If you have any additional questions, feel free to contact us!
