Night and Day International Investigation

I can investigate night and day in different parts of the Earth.
I can report and present findings from enquiries.

Prediction and Results Table

Time	Sunrise (on average around 6am)	Midday (12pm)	Sunset (on average around 7pm)	Night (12am)
				
Prediction (Country)		UK		
Prediction Correct? Tick ✔ or Cross ✘				
If prediction was incorrect, what country /countries should it have been?				

Complete the following table. Pick a different country to the UK for midday. Using the Time Zones by Country Map calculate and find countries to fit in the other categories.

Time	Sunrise (on average around 6am)	Midday (12pm)	Sunset (on average around 7pm)	Night (12am)
				
Country				

Now write a conclusion explaining why night and day take place at different times in different places on Earth.
