

To run the Selection Translator script:

1. Make a copy of this document by selecting ***File > Make a copy***.
2. Once the copy opens, wait a few seconds and reload the page.
3. After the page reloads, a **Translate Selection** menu should appear in the Google Docs menu bar.
4. Select some text in the document, then choose **Translate Selection > English to Spanish**.

Google Apps Script is a JavaScript cloud scripting language that lets you extend Google Apps and build web applications. Google Apps Script is very versatile. Here are some examples of things you can do with Google Apps Script:

- Build custom functions in a Google Spreadsheet
- Extend certain Google Apps products by creating custom menus linked to scripts
- Create and publish web applications, which can run on their own or embedded within a Google Site
- Schedule tasks like report creation and distribution and run them on a custom schedule
- Automate workflows such as document or expense approvals, order fulfillment, time-tracking, and more
