ABSTRACT

No more than 250 words, written in English and Bahasa Indonesia in one paragraph containing: The research objectives, research methodology, data analysis, and research findings. It is typed using font Palatino Linotype 10 and single space.

This is an open access article under the CC BY-SA license.

1. INTRODUCTION

The introduction is written using capital letters [font Palatino Linotype 10, capital letter, and bold] containing the background with a problem, the gap of the problem, the urgency and rationalization of activities, solution plan, the objective of the activity, and hypothesis development.

2. METHOD

Research methodology explains about: the approach, scope or object, operational definition in each variable/description of research focus, place, population and sample/informant, main source and tool, technique of data collection, and technique of data analysis. [font Palatino Linotype, 10, Normal]

3. FINDING AND DISCUSSION

The results obtained from the research have to be supported by sufficient data. The research results and the discovery must be the answers, or the research hypothesis stated previously in the introduction part.

2.1. Subsection

Heading 1: use this style for level one headings

Heading 2: use this style for level two headings

Heading 3: use this style for level three headings

Heading 4: create the heading in italics.

Bulleted lists look like this:

- First bullet
- Second bullet
- Third bullet

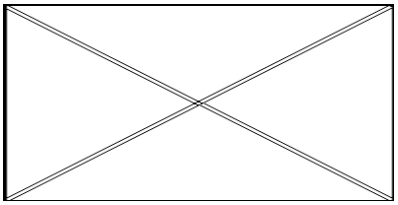

Numbered lists can be added as follows:

1. First item
2. Second item
3. Third item

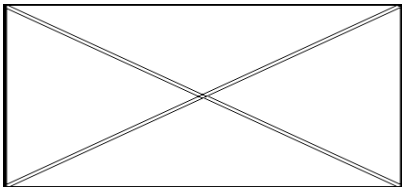

The text continues here.

2.2. Figures, Tables and Schemes

All figures and tables should be cited in the main text as Figure 1, Table 1, etc.

(a)

(b)

Figure 1. This is a figure, Schemes follow the same formatting. If there are multiple panels, they should be listed as: (a) Description of what is contained in the first panel; (b) Description of what is contained in the second panel. Figures should be placed in the main text near to the first time they are cited. A caption on a single line should be centered.

Table 1. This is a table. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data 1

[1]Tables may have a footer.

2.3. Formatting of Mathematical Components (if any)

This is an example of an equation:

$$a = 1, \tag{1}$$

the text following an equation need not be a new paragraph. Please punctuate equations as regular text.

Theorem-type environments (including propositions, lemmas, corollaries etc.) can be formatted as follows:

Example text of a Quote. Quote quote. quote The text continues here. Proofs must be formatted as follows: quote quote quote quote quote quote quote quote quote quote quote quote quote quote quote,

The text continues here.

Discussion: The discussion is highlighted through the title and subtitles of the section when needed

Authors should discuss the results and how they can be interpreted from the perspective of previous studies and of the working hypotheses. The findings and their implications should be discussed in the broadest context possible. Future research directions may also be highlighted. The following components should be covered in the discussion: How do your results relate to the original question or objectives outlined in the Introduction section (what/how)? Do you provide interpretation scientifically for each of your results or findings presented (why)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

4. CONCLUSION

The conclusion contains the short summary of the findings and discussion. Conclusion is the findings in the research that has the answers for the research questions or the objective of the research. The research findings give suggestions or contributions to the application and/or the study development. [Palatino Linotype, 10, Normal]

REFERENCES

The literature listed in the References contains only the sources referenced or included in the article. We recommend preparing the references with a bibliography software package, such as Mendeley, EndNote, Reference Manager or Zotero to avoid typing mistakes and duplicated references. Referral sources should provide 80% of journal articles, proceedings, or research results from the last five years. Writing techniques bibliography, using the system cites APA (American Psychological Association) Style and the 6th edition.
