Summary:
RedTigerPro is proud to announce the launch of our Indie Accelerator Program plus current and future projects. These announcements will significantly shift how we operate and plan to impact the video game industry.

HEADLINE:
RedTigerPro announces the launch of its Indie Accelerator Program and The Future

Austin, TX, 1/1/24 - We announced the launch of our Indie Accelerator Program a few weeks ago. The program will allow us to effectively help indie developers with their progress in developing their games. We can help from drafting the game's initial concept to publishing and marketing, putting us in a position to provide the best help possible.

We have games published on Steam, Itch.io, and mobile from Indie Developers. The games are Gem Setters, Yoku Redux: Dreams of a Blue Planet, Death & Taxes: The Last Hold, Rite of Kings, and more. As we continue to grow, indie developers will grow as well. We recognize what is going on within the industry, especially for indie developers trying to make it.

Right now, we are currently running a revenue-sharing model. This allows for a fair percentage between the two parties. We are assuring developers that what they make is exactly what they make—no ifs, and's, or buts about it. Stay tuned for announcements about future projects, cool campaigns, and more! We're excited to be a part of this wonderful community and help indie developers thrive in this continuously growing community.
