Resume

Ronald Allan Rivera

I'm a full-stack Web Developer with 20+ years of experience delivering production-ready solutions across eCommerce, SaaS, AI, and marketing technology. I specialize in modern frontend development with **React.js and Next.js**, along with backend systems using **Laravel/PHP** and **Python/Django**, plus **Python automation** and scalable **WordPress plugin development**. My recent work includes building **full-stack Next.js platforms** with headless CMS, TypeScript, and PostgreSQL, developing **AI-powered SaaS applications** with Django, OCR, and real-time response systems, creating **automation tools and data pipelines** for business workflows, and engineering **Laravel applications** with advanced dashboards, lead systems, tracking, and reporting. I also continue to build custom **WordPress plugins** for search, eCommerce, and content-heavy platforms. I focus on performance, scalability, SEO, and maintainability, ensuring every system is optimized, reliable, and built for long-term growth.

Latest Experience

Web Developer
Company Name: LogicMedia BV
Description: An online marketing agency.
Date Joined: June 2015 - Present

- Partner directly with the CEO to lead **end-to-end web development** initiatives, delivering high-performance marketing and interstitial websites that drive engagement and conversions.
- **Develop full-stack tools and applications** using **Python, Django, React.js, and Next.js**, streamlining internal workflows and improving operational efficiency.
- Spearhead **domain, hosting, and CDN configurations** (Cloudflare), optimizing site performance, security, and uptime.
- Write **high-impact marketing content** for landing pages and promotional websites, leveraging **AI-powered prompt engineering** for maximum conversion.
- Produce **training documentation, video tutorials, and marketing content**, including **YouTube video editing and uploads**, supporting cross-department needs.
- Act as a **multi-functional resource**—from developer to virtual assistant—helping the company achieve cost and time savings by consolidating multiple roles into one.

Senior Full-Stack Web Developer (Contract)
Company Name: Self-Employed / Independent Consultant
Date Joined: July 2007 - Present

- Delivered **full-stack web solutions** for long-term clients in marketing, SaaS, and data-driven industries, including a **10+ year engagement with a U.S.-based digital marketing operator**.
- Designed and developed **high-conversion websites** using **WordPress, Elementor, and custom PHP/Laravel architectures** optimized for performance and scalability.
- Built **custom WordPress plugins, advanced search systems, and dynamic content workflows** integrating AI (**OpenAI**), automation (**Zapier, Make.com**), and Google services.
- Developed **Laravel-based backend systems and admin dashboards** for managing content, analytics, and automation pipelines.
- Created **Python-based automation tools** (Playwright, Selenium, Tkinter) for data extraction, reporting, and workflow optimization.
- Implemented **SEO, analytics, and tracking systems** using **Google Tag Manager** and performance optimization strategies.
- Produced **digital assets including UI designs, branding, and video content** using Adobe Creative Suite.
- Reduced manual marketing operations by up to **80%** through **automation and AI-assisted workflows**.

Past Experience

Web Designer
Company Name: SiteBuilder123.com
Description: A small, experienced team specializing in website development and marketing.
Date Joined: February 2015 - December 2015

- Built WordPress websites tailored to client requirements, focusing on modern, responsive design.
- Designed marketing materials like tarpaulins, brochures, and streamers, helping clients effectively communicate their brand messages.

Lead Banner Designer - Contractual
Company Name: Bowzed.com
Description: Helps companies of all sizes acquire customers affordably and efficiently.
Date Joined: March 2015 - May 2015

- Designed and coded marketing banners using HTML, CSS, and JavaScript, ensuring responsive and engaging designs.

Freelance Graphic Designer
Company Name: Thunderbird Resort La Union Philippines
Description: A Mediterranean-inspired luxury resort in the northern Philippines.
Date Joined: May 2007 - November 2008
- Created graphic designs for promotional materials such as tarpaulins, brochures, and magazines, aligning visuals with the resort's premium branding.

Web Developer and Graphic Artist
Company Name: Danalex Graphic Arts and Call Center, Baguio City, Philippines
Description: A Graphic Arts, Web Design, and Software Development Company originally based in Honolulu, Hawaii, and Las Vegas.
Date Joined: April 2006 - July 2007
- Developed websites using PHP, MySQL, XHTML, and CSS, ensuring functionality and adherence to client requirements.
- Designed and converted website mockups from Photoshop into working front-end interfaces.

Web/Graphic Designer and Customer Representative
Company Name: Web Coast Design Inc., Baguio City, Philippines
Description: A website design and development company serving clients across the United States.
Date Joined: March 2005 - April 2006
- Collaborated with clients to design and develop custom websites that aligned with their business goals.
- Worked closely with senior designers to learn and apply advanced web and graphic design techniques.

High School Math Instructor
Company Name: Agoo Academy
Description: A school in La Union, Philippines.
Date Joined: June 2004 - March 2005
- Taught mathematics subjects, including Geometry, Algebra, Statistics, and Trigonometry, to high school students.
- Served as a general section adviser and part-time computer instructor, teaching basic IT skills.

Final Weigher
Company Name: Union Leaf Tobacco Corporation
Description: A tobacco company based in the Philippines.
Date Joined: March 2003 - June 2004
- Ensured all packed tobacco met exact weight requirements before transferring to the warehouse.
- Provided technical support to production clerks, resolving computer-related issues to maintain operational efficiency.

Education

Bachelor of Science in Computer Engineering
AMA Computer University - Quezon City, Philippines
May 2000 - May 2004

Personal Particulars

Date of Birth: 11 Apr 1982
Gender: Male
Marital Status: Married
Nationality: Filipino
Permanent Residence: Philippines

Latest Projects

FULL STACK DEVELOPMENT

LogicHub - Internal Marketing Operations Hub (Next.js 16 + Supabase)
Full Stack Next.js + TypeScript Developer
https://gitlab.com/nochilldepril/logichub (confidential)
Architected a production operations platform for a direct-response affiliate marketing company, consolidating CMS, ad analytics, redirects, asset management, and AI creative generation into one dashboard — replacing five legacy tools. Built as an npm-workspaces monorepo with a Next.js 16 + React 19 dashboard and a separate SSR traffic server, backed by Supabase Postgres with RLS and Cloudflare R2 media via the S3 SDK. Unified ad reporting across Google Ads, Rumble Ads, and FunnelFlux with tiered cron syncs, automated Google Sheets + email reports, and Slack alerts. Shipped LogicGen, an in-house AI creative suite for image, video, lip-sync, and TTS, orchestrating OpenAI Whisper, OpenRouter, ElevenLabs, and Kie.ai (GPT Image + Kling 3.0). Delivered a YouTube downloader with transcription, QR-code redirect system, and a drag-and-drop media library. Built with shadcn/ui, Tailwind v4, TanStack Table, TipTap, nuqs, Zustand, and Zod - type-safe end-to-end with Vitest coverage.

Resume + Portfolio CMS (Next.js + Payload CMS)

Full Stack TypeScript Developer

https://www.allanai.dev/

Engineered a production-ready, CMS-driven resume and portfolio platform using Next.js, Payload CMS, TypeScript, and PostgreSQL, combining frontend, backend, and admin panel in a single scalable application. Implemented a professional animation system using Framer Motion and GSAP-inspired techniques - including word-by-word hero text reveals, scroll-triggered staggered animations with Apple-style easing curves, edge-slide card transitions, and an interactive 3D starfield canvas running at 60fps with accessibility and reduced-motion support. Built with Docker-based development, role-based access control, draft/publish workflows, and SEO-optimized ISR rendering. Integrated AI-powered resume and cover letter generation via OpenAI, Google OAuth2 for document export, and a modular multi-template UI system. Achieved Lighthouse scores of 91 (mobile) and 100 (desktop) through GPU-accelerated animations, mobile optimization, and performance-first architecture. Established CI/CD pipelines with Vitest and Playwright for production-grade reliability.

Meet Lessons

Full Stack Django + Python Developer

https://github.com/RonaldAllanRivera/auto-respond/

Engineered an AI-powered SaaS platform combining a Python OCR desktop client and Django backend to generate real-time answers from screenshots and study materials. Implemented multi-tenant architecture, secure device pairing with token validation, Stripe subscription billing with webhook sync, document ingestion for PDFs/images, and live AI response streaming via SSE. Containerized with Docker and deployed to cloud infrastructure for production-ready scalability.

Forex Signals Platform (D1/W1/MN1)

Full Stack Laravel Developer

https://github.com/RonaldAllanRivera/forex

Developed a production-ready Laravel 12 forex analysis platform for higher-timeframe market signals, featuring automated candlestick data ingestion from Alpha Vantage, idempotent upserts, AI-generated BUY/SELL/WAIT trade signals, TradingView-powered charting, scheduler-driven jobs, and daily email reporting. Implemented secure authentication, admin trade review workflows, JSON APIs, and a resilient service architecture designed for reliability, automation, and production-scale maintainability.

AWS E-commerce Microservices

Full Stack Laravel Developer

https://github.com/RonaldAllanRivera/aws_ecommerce

Architected a microservices-based e-commerce system using three Laravel services and a Vue 3 SPA frontend. Implemented asynchronous messaging, Docker containers, and AWS CloudFormation deployment on EC2.

Modular Frontend with Advanced Marketing & Lead Gen Tools

Full Stack Laravel Developer

https://github.com/RonaldAllanRivera/traderai.live

Engineered a modular Laravel platform with multi-template switching, advanced lead generation pipelines, CAPTCHA validation, rate limiting, rule-based cloaking middleware, dynamic pixel injection, and enterprise-grade security controls.

Multi-Source Marketing Data Dashboard (CSV/JSON)

Full Stack Laravel Developer

https://github.com/RonaldAllanRivera/report-system-laravel

Built a performance marketing reporting system that normalizes CSV and JSON exports from multiple platforms into structured dashboards with strict campaign matching and spreadsheet-ready outputs.

Cars Images API

Full Stack Laravel Developer

https://github.com/RonaldAllanRivera/cars-images-api

Developed a Laravel and Filament system integrating with Wikimedia Commons to fetch, validate, and manage high-resolution car images with scalable admin tools and optimized data workflows.

Book Reader

Full Stack AI Systems Developer

https://github.com/RonaldAllanRivera/book-reader

Created a Python automation system using Selenium, OCR, and LLM integration to extract text from browser-based reading platforms and generate AI-assisted quiz answers with structured configuration and logging.

Figma to Elementor Clone

Full Stack Laravel Developer

https://github.com/RonaldAllanRivera/elementor-clone

Built a Laravel platform that converts Figma designs into clean HTML previews and Elementor-compatible JSON exports for WordPress import, with authenticated project management and Docker deployment.

WORDPRESS DEVELOPMENT

Used Cars Search

WordPress Plugin Developer

https://github.com/RonaldAllanRivera/used-cars-search

Engineered a scalable WordPress search and comparison plugin for large used-car inventories with lightning-fast autosuggest, advanced filtering, sortable results, and side-by-side vehicle comparison. Implemented AI-powered content generation with an unattended WP-Cron background queue, CSV import pipeline, conflict-safe SEO meta system, REST API integration, and a performance-focused architecture built with Vanilla JavaScript (ES6) and the WordPress REST API. Designed for high performance, maintainability, and large-dataset scalability.

Featured Resource Block

WordPress Plugin Developer

https://github.com/RonaldAllanRivera/featured-resource-block

Developed a production-ready WordPress plugin featuring a custom post type, Elementor widget, scheduled JSON syncing, caching, and hardened security with strict sanitization and capability checks.

IRANK Calc & Cards

WordPress Plugin Developer

https://github.com/RonaldAllanRivera/irank-calc-cards

Engineered high-performance Gutenberg blocks including a real-time calculator and swipeable product cards using server-rendered architecture and lightweight vanilla JavaScript.

Popular AI Software Search

WordPress Plugin Developer

https://github.com/RonaldAllanRivera/software-search

Created a modern AJAX-powered search plugin using vanilla JavaScript and Fetch API with autosuggest, filtering, and admin management tools.

Ozeum Museum

Custom WordPress Theme Developer

https://artworkwebsite.com/

Built a professional custom WordPress theme for museums and cultural institutions using modern best practices. Implemented a custom Exhibitions post type, responsive mobile-first layouts, GSAP-powered animations, one-click demo import, and a custom admin tools panel. Delivered strong performance optimization (cache busting, conditional loading, no jQuery), SEO enhancements with Yoast integration and auto-populated metadata, and accessibility best practices aligned with WCAG principles.

StrategicGrowthPlanning.com

WordPress and Elementor Developer

Developed a professional WordPress website using Elementor with a strong focus on business consulting services, structured service pages, responsive design, SEO optimization, and performance tuning for improved user engagement and lead generation.

GaitBeacon.com

WordPress and Elementor Developer

Custom WordPress and WooCommerce site built with Elementor, optimized checkout flow, SEO configuration, performance tuning, and security hardening.

EverythingUsedCars.com

WordPress and Elementor Developer

Developed a responsive WordPress site with advanced search filters, SEO optimization, caching setup, and scalable architecture.

PopularAISoftware.com

WordPress and Elementor Developer

Built an AI tools directory integrating OpenAI, automation workflows, and WordPress customization for a dynamic user experience.

78Dragons.com

WordPress and Elementor Developer

Developed a WooCommerce eCommerce platform with structured product management and optimized purchasing flow.

SmarterSafetySystems.com
WordPress and Elementor Developer
Built a WordPress site for an IoT safety solutions provider with structured content and scalable architecture.

LumbardConsulting.com
WordPress and Elementor Developer
Created a professional WordPress site for a leadership consulting firm with optimized UX and structured service pages.

24Aries.com
WordPress Developer
Developed a WordPress website showcasing advanced technology products with responsive layout and structured presentation.

PulseIQ.com
WordPress and Elementor Developer
Built a WordPress site for energy benchmarking and management solutions with SEO configuration and performance optimization.

AUTOMATION & SOFTWARE ENGINEERING

Cloudflare Multiple Domain Delete (GUI)
Full Stack Python Developer
https://github.com/RonaldAllanRivera/cloudflare-multiple-domain-delete
Built a Tkinter-based desktop tool for safely bulk deleting Cloudflare domains with progress tracking and structured logging.

HTTrack-like Clone
Full Stack Python Developer
https://github.com/RonaldAllanRivera/httrack-clone
Developed a desktop application that mirrors web pages into clean offline folders with asset rewriting, structured output, and preview capabilities.

Interactive Map Scraper
Software Developer
https://github.com/RonaldAllanRivera/mapscraper
Created a Python GUI tool to extract structured data from Mapbox-based interactive maps.

CSV Scraper GUI
Software Developer
https://github.com/RonaldAllanRivera/csv_scraper_gui
Built a Selenium-based desktop scraper designed for heavily protected websites using realistic browser automation techniques.

GRAPHIC DESIGN

https://www.flickr.com/photos/ronald-allan-rivera/
Collection of branding, layout, and digital design projects demonstrating visual communication and creative direction.
