Start writing your abstract here. It should give a clear, concise overview of your presentation — covering the research problem and objective (s), the methods applied, the key findings, conclusions and implications or contributions. The entire abstract must be formatted in times new roman, size 10, single-spaced, and justified. Any abbreviation should be spelled out in full the first time it appears, with the short form given in parentheses immediately after. Write numbers as numerals, except when they begin a sentence. Submissions must be a Microsoft word (.docx) file and must not exceed 300 words. Using this document as your template is recommended, since it already follows the required formatting and styles. References or citations should not be included in the abstract, and a separate references section is not permitted.

**Keywords:** Keyword1; Keyword2; Keyword3; Keyword4; Keyword5 Provide 2 to 5 keywords. Use capital letters at the beginning of each keyword. Each keyword must be separated with a semicolon (;) and do not use a period (.) at the end.

Note: Please do not change page margins or adjust other formatting.
