

Proposed agenda & Notes

- General updates:
 - Kris: Core issues that affect us
 - Nothing new
 - Kris: Status update on [page manager](#)?
 - Wizard patch:
 - <https://www.drupal.org/node/2550879>
 - Juampy has been making loads of progress and andrewbelcher and yanniboi have been helping
 - Tests are passing!
 - Andrewbelcher:
 - “but there is quite a lot in there which is debatably out of scope”
 - “so I think the direction we're heading is to pick apart the patch to spin off other issues for those”
 - “we're going to tag them https://www.drupal.org/project/issues/search?issue_tags=p+m-ui-blocker so we can easily see where they are”
 - “the main difficulty I see is how to push forward those spin off issues in a way that's both timely but not putting a big burden on the other guys who aren't focussed on the PM UI stuff”
 - “in the mean time I think we're going to keep them in the UI patch with @fixme notes to remove when things get committed, but it obv just makes keeping track of everything a little harder :P”
 - timplunkett can help review the spin-off non-UI issues
 - Frega / David / aspilicious: Status update on [layout plugin](#)?
 - Put a patch on the core issue:
 - <https://www.drupal.org/node/2296423>
 - dsnopek has no time - timplunkett will help out!
 - Jakob / mortenson / DyanneNova / yanniboi: Status update on Panels / IPE port?
 - Updating Panels project with more accurate D8 information and telling people that layouts come from Layout Plugin
 - Japerry updated the project page!
 - japerry:
 - “so it came to my attention that we need to get some dev site up and/or some videos showing how the current system works, I think I had four or so people ask me last week how it works”

- “but last week worked on config categories, created a schema, and then got sidetracked on d.o stuff — so today I’m supposed to have more time to devote to panels”
 - Mortenson:
 - “Since we last met I got a few smaller bugfixes in, and a feature request that allows editing of Block Content <https://www.drupal.org/node/2688359>”
 - <https://www.drupal.org/node/2688399> is partially resolved by that issue as well
 -
 - “Next I’m working on some UX changes including consolidating the “Create Content”/“Place Content” tabs into one tab, which is what our original UX was and is also closer to what the Block UI will be. That will help port some of the code to Panels proper too as it will remove a lot of cruft”
 - andrewbelcher: Status update on mini-Panels?
 - No updates since last week
 - andrewbelcher: “though from seeing the work in PM, I’m feeling slightly less like there’s lots of re-usable bits yet”
 - David: Status updates on Panelizer?
 - No updates since last week
 - mortenson: My team ran into <https://www.drupal.org/node/2690275> this week, not sure if anyone else has seen this problem
 - Kris / Jakob: Status update on CTools?
 - Andrewbelcher: “well, got one issue to do with wizards that the PM UI stuff depends on <https://www.drupal.org/node/2690211>”
 - “adding support for wizards in link templates (ie using entity type id rather than machine name)”
 - “do it by using a param converter to fill our {machine_name} for the wizard etc from the {entity_type_id} param, meaning link templates etc all work (if you also provide a default step in the route)”
- Discussion topics for this week (switch to hangouts?):
 - Is it possible for page_manager_ui to create new custom block instances (like you can from IPE and from Block page)?
 - Mortenson: “No - but I have a CTools issue you can track which aims to share the same interface across IPE, Core, and Page Manager”
 - <https://www.drupal.org/node/2604178>
 -

Participants

- japerry

- andrewbelcher
- mortenson
- dsnopek
- timplunkett
- mpotter

Log

12:00 PM <japerry> gmorning all
12:00 PM <dsnopek> Hi Everyone!
12:00 PM <andrewbelcher> evening!
12:00 PM <Druplicon> I've had a perfectly wonderful evening. But this one wasn't it.
12:00 PM ⇐ cybtachyon quit (~cybtachyo@96-233.207-68.tampabay.res.rr.com) Ping timeout: 260 seconds
12:00 PM <dsnopek> Here's the notes/agenda for the meeting:
https://docs.google.com/document/d/1LMRxp-8NmVKBgBDPSVL3RmTMxC2fkG4itMsDgn_aURA/edit?usp=sharing
12:00 PM <mortenson> dsnopek: here!
12:00 PM <mortenson> oh you haven't asked yet
12:01 PM <dsnopek> Who all (aside from those who already said :-)) is here for the meeting?
12:01 PM ⇐ DyanneNova quit (~DyanneNov@50.240.26.14) Quit: DyanneNova
12:01 PM <dsnopek> Hm, no EclipseGC today?
12:02 PM → brantwynn joined (~brantwynn@c-50-129-162-94.hsd1.il.comcast.net)
12:02 PM <mortenson> House stuff I suppose
12:02 PM <mortenson> I'll check internal chat
12:02 PM <dsnopek> Ah, yeah
12:03 PM <mortenson> He's marked as busy in our chat
12:03 PM <dsnopek> Ah, well, we can start! We've got enough active folks (myself not included) to have an interesting meeting :-)
12:04 PM ⇐ kerasai quit (~kerasai@173-165-43-65-Illinois.hfc.comcastbusiness.net) Ping timeout: 252 seconds
12:04 PM <dsnopek> Is any one aware of any core stuff that affects us?
12:04 PM <mortenson> Nothing new, no
12:05 PM <dsnopek> mortenson: Ok, thanks!
12:05 PM <dsnopek> To something we could probably say more about! page_manager status...
12:05 PM ⇐ brantwynn quit (~brantwynn@c-50-129-162-94.hsd1.il.comcast.net) Client Quit
12:05 PM <dsnopek> andrewbelcher: I know you've been working on this a whole bunch!
12:05 PM → brantwynn joined (~brantwynn@c-50-129-162-94.hsd1.il.comcast.net)
12:05 PM <dsnopek> At least judging by issue comments :-)
12:05 PM <andrewbelcher> yes, yanniboi and I have been working with juampynr who has done most of the work
12:06 PM <andrewbelcher> we've got it passing tests!
12:06 PM <andrewbelcher> but there is quite a lot in there which is debatebly out of scope

12:06 PM <dsnopek> andrewbelcher: Woohoo! That's awesome :-)

12:07 PM <andrewbelcher> so I think the direction we're heading is to pick apart the patch to spin off other issues for those

12:07 PM <andrewbelcher> we're going to tag them
https://www.drupal.org/project/issues/search?issue_tags=pm-ui-blocker

12:07 PM <andrewbelcher> so we can easily see where they are

12:07 PM <dsnopek> andrewbelcher: That sounds like a good idea! Last time EclipseGC and I talked with timplunkett about the patch, he wanted to spin off all the non-UI stuff into separate issues

12:08 PM <mortenson> that's a great move

12:08 PM <andrewbelcher> the main difficulty I see is how to push forward those spin off issues in a way that's both timely but not putting a big burden on the other guys who aren't focussed on the PM UI stuff

12:10 PM <dsnopek> andrewbelcher: Yeah.. Lots of good tests?

12:10 PM <andrewbelcher> in the mean time I think we're going to keep them in the UI patch with @fixme notes to remove when things get committed, but it obv just makes keeping track of everything a little harder :P

12:10 PM <andrewbelcher> dsnopek: yeah - that's the only idea I've had so far :P

12:11 PM <dsnopek> andrewbelcher: Cool, thanks for the updates!

12:11 PM <timplunkett> andrewbelcher: i can help review the spin offs

12:11 PM <andrewbelcher> timplunkett: that would be great - I know you've already reviewed at least one of them!

12:12 PM <andrewbelcher> at least one of them is also in CTools as well, rather than PM, but I'm guessing all the same things will apply

12:12 PM <dsnopek> Next up: layout_plugin!

12:12 PM <dsnopek> I still haven't had any time, but timplunkett is going to pick up work on the core issue

12:12 PM <dsnopek> Double extra thanks to him! :-)

12:12 PM <dsnopek> timplunkett++

12:12 PM <dsnopek> Next up: panels!

12:13 PM <dsnopek> japerry: mortenson: Panels status updates?

12:13 PM → DyanneNova joined (~DyanneNov@50.240.26.14)

12:13 PM <japerry> dsnopek: so it came to my attention that we need to get some dev site up and/or some videos showing how the current system works, I think I had four or so people ask me last week how it works

12:13 PM <mortenson> dsnopek: Since we last met I got a few smaller bugfixes in, and a feature request that allows editing of Block Content <https://www.drupal.org/node/2688359>

12:13 PM <Druplicon> <https://www.drupal.org/node/2688359> => Allow editing of a block content [#2688359] => 19 comments, 6 IRC mentions

12:13 PM <dsnopek> japerry: Yeah, I got pinged on Twitter about that yesterday :-)

12:14 PM <mortenson> (via a form, not quickedit)

12:14 PM <mpotter1> mortenson++ that one was awesome

12:14 PM <japerry> but last week worked on config categories, created a schema, and then got sidetracked on d.o stuff — so today I'm supposed to have more time to devote to panels

12:14 PM <dsnopek> japerry: I vote for a video

12:14 PM <japerry> dsnopek: k, maybe I'll make one up today

12:14 PM <japerry> that shouldn't take too long

12:14 PM <mpotter1> japerry: videos would be super useful...I find myself asking noob questions in IRC on basic stuff still

12:15 PM <dsnopek> mortenson: Oh, wow, I didn't realize that got in already! Awesome!

12:15 PM <mortenson> dsnopek: Next I'm working on some UX changes including consolidating the "Create Content"/"Place Content" tabs into one tab, which is what our original UX was and is also closer to what the Block UI will be. That will help port some of the code to Panels proper too as it will remove a lot of cruft

12:15 PM <japerry> kk I'll put that on my list today. I need to try out panelizer as well

12:15 PM <mortenson> dsnopek: Ah, and <https://www.drupal.org/node/2688399> is partially resolved by that issue as well

12:15 PM <Druplicon> <https://www.drupal.org/node/2688399> => IPE doesn't check block content entity permissions on routes leading to access bypass [#2688399] => 7 comments, 6 IRC mentions

12:16 PM <mortenson> (notes in issue)

12:16 PM <dsnopek> mortenson: Cool, thanks!

12:17 PM <dsnopek> Following up on something from last week: did anyone have a chance to make any updates to the Panels project page?

12:17 PM <dsnopek> Oh, yes, someone did! :-)

12:17 PM <dsnopek> japerry: Thank you!

12:17 PM <dsnopek> japerry++

12:18 PM <japerry> oh yup

12:18 PM <mortenson> japerry++

12:18 PM <dsnopek> japerry: mortenson: Thanks for updates, guys!

12:18 PM <dsnopek> andrewbelcher: Any status updates on mini-panels?

12:19 PM <andrewbelcher> no, been focusing on PM

12:19 PM <dsnopek> andrewbelcher: Ok, thanks!

12:19 PM <andrewbelcher> though from seeing the work in PM, I'm feeling slightly less like there's lots of re-usable bits yet

12:20 PM <dsnopek> Next up: Panelizer!

12:20 PM <andrewbelcher> though I know EclipseGc is working on making some of the context stuff live in CTools which would be a great example of where it should be sharing stuff

12:20 PM <dsnopek> andrewbelcher: Yeah, I think the plan is more and more stuff will be moving to CTools, so it'll be easy to reuse the same UIs

12:21 PM <dsnopek> So, I have no status updates for Panelizer

12:21 PM <mortenson> My team ran into <https://www.drupal.org/node/2690275> this week, not sure if anyone else has seen this problem

12:21 PM <Druplicon> <https://www.drupal.org/node/2690275> => No Contextual links added to fields [#2690275] => 2 comments, 1 IRC mention

12:21 PM <dsnopek> mortenson: Hm. Do the contextual links get added when overriding an entity view page in Page Manager?

12:22 PM <dsnopek> mortenson: I suspect this isn't a Panelizer problem, but a problem with the Entity Field block from Ctools...

12:22 PM <mortenson> dsnopek: I'll add a note to the issue and see if BCWald can confirm that

12:22 PM ← rvillan quit (~rvillan@wsip-70-166-12-153.sd.sd.cox.net) Quit: Leaving.

12:23 PM <dsnopek> mortenson: Great, thanks!

12:23 PM <mortenson> "We should test to see if this is a CTools issue by overriding an entity view page with Page Manager/the Page Manger "BlockDisplay" variant."

12:23 PM → rvillan joined (~rvillan@wsip-70-166-12-153.sd.sd.cox.net)

12:23 PM <dsnopek> mortenson++

12:23 PM <dsnopek> Lastly, is CTools!

12:24 PM <dsnopek> Without EclipseGC, I dunno if anyone else has any status updates about it to share?

12:24 PM <mortenson> none from me

12:24 PM <andrewbelcher> well, got one issue to do with wizards that the PM UI stuff depends on

12:25 PM <andrewbelcher> <https://www.drupal.org/node/2690211>

12:25 PM <Druplicon> <https://www.drupal.org/node/2690211> => Allow link templates for wizards [#2690211] => 3 comments, 2 IRC mentions

12:25 PM <andrewbelcher> adding support for wizards in link templates (ie using entity type id rather than machine name)

12:25 PM <andrewbelcher> still needs tests written though :P

12:26 PM <dsnopek> andrewbelcher: Oh, that is interesting!

12:27 PM <andrewbelcher> do it by using a param converter to fill our {machine_name} for the wizard etc from the {entity_type_id} param, meaning link templates etc all work (if you also provide a default step in the route)

12:27 PM <dsnopek> andrewbelcher: If we have the entity upcasted as part of the route, could we replace the _permission: 'administer pages' with _entity_access: page.edit?

12:27 PM <dsnopek> andrewbelcher: That's something that has always bothered me with the wizard patch

12:28 PM <andrewbelcher> dsnopek: almost certainly - I'll have a try tomorrow and see

12:28 PM <andrewbelcher> can include that in the tests

12:28 PM <dsnopek> andrewbelcher: Awesome, thanks!

12:29 PM <dsnopek> Alright, thanks, everyone! That's all the status updates

12:29 PM <dsnopek> We don't have anything on the agenda to discuss for this week

12:29 PM <dsnopek> Does any one have anything they'd like to discuss while we're all here?

12:30 PM <mpotter1> question, maybe for andrewbelcher. Is it possible for page_manager_ui to create new custom block instances (like you can from IPE and from Block page)?

12:30 PM <andrewbelcher> mpotter1: hmm.... it's probably not part of the UI stuff we're working on

12:30 PM <mortenson> mpotter1: No - but I have a CTools issue you can track which aims to share the same interface across IPE, Core, and Page Manager

12:30 PM <andrewbelcher> that is within the variant plugin

12:31 PM <mortenson> mpotter1: <https://www.drupal.org/node/2604178>

12:31 PM <Druplicon> <https://www.drupal.org/node/2604178> => Modify core block UI to separate blocks into categories with tabs [#2604178] => 10 comments, 12 IRC mentions

12:31 PM <mpotter1> andrewbelcher: that would be useful.

12:31 PM ← marthinal quit (~chatzilla@173.Red-83-38-189.dynamicIP.rima-tde.net) Ping timeout: 248 seconds

12:32 PM <mortenson> mpotter1: If you ping in that issue with your requirements Kris (or whoever works on that issue) can follow up in that or a new task after that's committed

12:32 PM <mpotter1> andrewbelcher: this would be more like adding content, like the add static content blocks in the D7 Add popup

12:32 PM <mpotter1> but yeah, I can create an issue for this

12:32 PM <andrewbelcher> mpotter1: yeah, I think the CTools issue mortenson linked is the place for that

12:32 PM <andrewbelcher> however it is solved, it will need to apply to both the block page and panels variants, CTools sounds like it's home :)

12:34 PM <andrewbelcher> timplunkett: as per your offer - I've updated <https://www.drupal.org/node/2690047> since your feedback ;)

12:34 PM <Druplicon> <https://www.drupal.org/node/2690047> => Allow setting the Page on a PageVariant [#2690047] => 13 comments, 3 IRC mentions

12:35 PM <dsnopek> Anything else anyone wants to jam about?

12:36 PM <dsnopek> Shall we call this a meeting?

12:36 PM <mortenson> I'm good with that!

12:36 PM <dsnopek> Alright! I'm gonna call it. :-) Thanks, Everyone!
