SL: "I almost killed someone with my PC"

I was so angry… I grabbed my PC and wanted to throw it out the window.

But then I realized that there are some people below my window (I live on the 10th floor).

If I had let go of it, this would hit somebody in the head.

Eventually, I calmed down. But the anger didn't go away.

I was furious. I spent so much money on this music-making software, yet…

I couldn't finish a single beat…

Every session ended up with frustration, which only fed my anger.

However, I couldn't digest the idea of giving up, after investing all my savings into this program.

So I decided to give it another chance.

And this time… It worked.

Now, I cook beats faster than my grandma cooks pancakes.

My SoundCloud and other social media grow quicker and quicker,

And my career is finally on a good path.
