Dear Mr. Essabti,

I am a fourth-year student at ENSAF and am interested in pursuing a career as an industrial engineer upon graduation. I'm particularly writing to you to apply for an internship in the production department. I came across the internship description on GoAbroad.com, and was delighted to find that my academic accomplishments meet all of the necessary requirements. I am seeking a challenging but rewarding internship, which is why I was drawn to this exciting opportunity.

As an industrial student at the Ensaf, I have acquired skills in with great knowledge of statistical methodologies that are used to determine manufacturing costs, procedures and production standards, I am in a league of my own as you will discover when we work together. I have some knowledge of designing and determining equipment layouts along with managing materials and workspace to ensure the very best in production procedures using tools like CATIA V5 and labVIEW. My knowledge of engineering specifications that rule each production stage is well defined, and I take pride in my ability to work in sync with resources and people at every stage of the production cycle.

During last summer, I had an internship in the production field in a Moroccan jam company. It has helped me to know more about working at a company. It showed me the importance of the time management when having a deadline.

In addition to these qualifications, my keen attention to detail and strong time management skills are what I think sets me apart from other candidates. If you're interested in discussing this opportunity further, then please contact me at your earliest convenience.

Thank you for your consideration. I would be delighted to have an opportunity to personally interview with you. Please accept the enclosed resume and feel free to contact me at your earliest convenience. I appreciate your time and consideration.

Yours sincerely,

Kammachi Zineb
