# Baby Shark Remix!

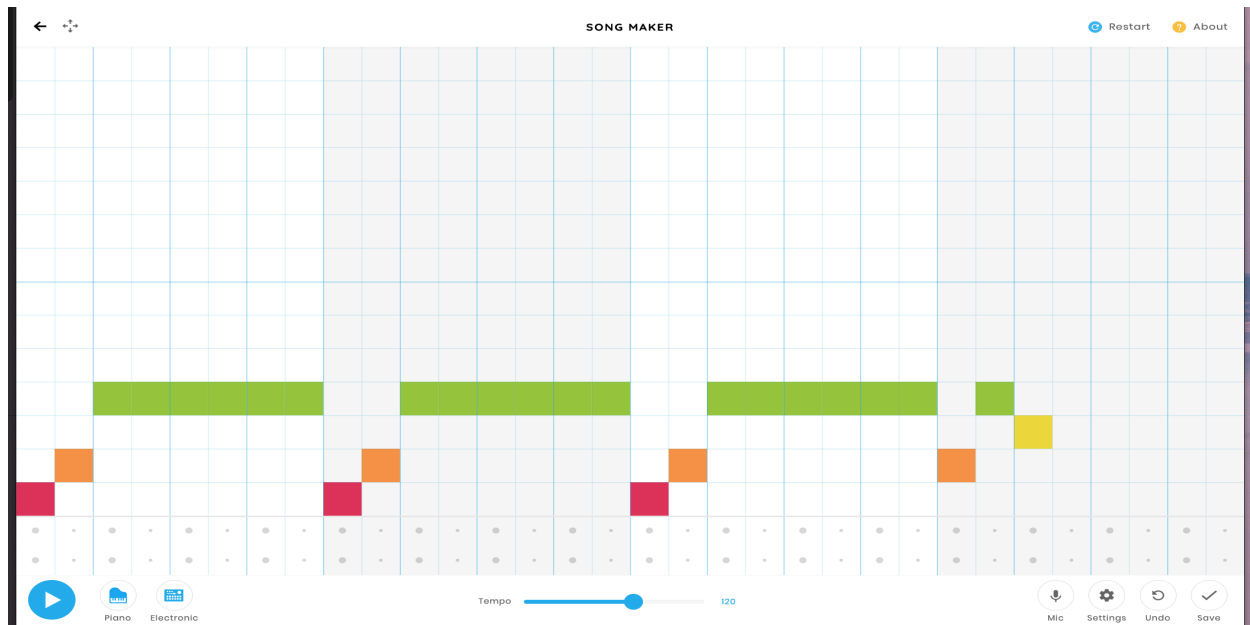

1. Click HERE to go to Song Maker from Chrome Music Lab and explore the different tools on the page!

2. Recreate the pattern BELOW on your own screen by clicking the squares. (Hint: it sounds just like Baby Shark!)

3. Change the instruments around by clicking on the picture of the instrument next to the "play" icon

4. Add beats underneath your Baby Shark melody by clicking the different "dots" underneath (the arrow is pointing at the dots for your beats).

5. You can change the speed of the music (also called the TEMPO) by sliding this back and forth.

6. Once you have made a remix that you like, hit the save button (see red circle on picture). When you hit save, a link will come up. Press the COPY LINK button and then paste the link in this Google Form: Baby Shark Remix Depository This way you can access your project later, and your teachers can see your awesome creations.
