

Defuse Report Guide

We enforce most things from the [Roblox guidelines](#), though there are some topics that aren't entirely clear. This guide helps explain what less obvious assets are categorized as.

- **Suggestive Clothing**

Clothing depicting thongs and wedgies. Or clothing that seems too sexual.

While swimwear and bras are sometimes taken down, there is a conflicting history that we haven't understood for certain clothing items to stay back in Roblox's earlier years. For those types of clothing, consider if there's some bad intention to it, check if the description contains any words (tong, bypass, wedgie, etc.) or check the group for other clothing items. If not sure, submit it anyways, if we don't deem the asset to be in the tracker then it'll just be silently removed.

- **Realistic Inappropriate Shading**

Shading that depicts stomachs, abs, and especially breasts and ribs, since the latter could be seen as encouraging eating disorders.

If the shading doesn't depict any notable features, don't submit it. Collarbones fall under this. We're not too sure what moderation thinks when the shading isn't detailed. If unsure, submit it anyway.

- **Inappropriate Image: Softcore**

Suggestive images where a character is depicted in a questionable pose/view angle are considered inappropriate.

Softcore fetishes such as Inflation and Vore are considered inappropriate, but just because a character looks to be highly overweight doesn't always mean it has bad intentions (i.e: Fat noob sticker from Work at a Pizza Place). Consider if something is meant to be sexual before submitting. Often, finding the original artist if you're unsure is a good way to determine its intent. If the artist is a sexual account, include the link to the original image in the comment.

- **Offensive/Discriminatory/Hate Speech**

For hate symbols, the [ADL Hate Symbol Database](#) is a good list on what symbols Roblox bans. While not made obvious in [Roblox's guidelines](#) for this subject, Roblox does ban hate against furies, slenders and the likes, this also includes hate symbolism such as a crossed out paw or character.

While Roblox does ban some derogatory memes, the Ugandan Knuckles meme is a slight exception in Defuse as it was mostly agreed that the meme isn't offensive UNLESS the meme is being used in an inflammatory way.

- **Politics**

While politics is disallowed according to the Roblox guidelines, our reports are often ignored so we don't try enforcing this and will silently remove any submissions unless it is inflammatory in some way.

Other Information

In general, consider if an asset was uploaded for bad intentions. There are some cases where Roblox's guidelines are bent, such as off-site links being allowed on certain groups; we aren't going to try reporting those since Roblox has shown in the past to reinstate certain stuff.

We do not accept submissions of Roblox uploaded items. Yes, there are cases where the Roblox account has uploaded inappropriate audio, but we aren't able to do anything about it. Defuse isn't able to solve copyright issues for you. All requests for removing stolen clothing, models or games will be rejected and marked as safe.

Most reports or excessively loud audios will be rejected, as there are cases where loud audio is used in games. Consider the intent of the audio and whether it was meant to be bypassed or not before you submit it.

Defuse wasn't created to enforce all of Roblox's rules, but we certainly don't want blatantly inappropriate or offensive content to appear in games.
