TIPS ON HOW TO MAKE MONEY

By RyRavioli

1. /shop will be the 1st money making method on this list as the server shop pays a good bit of money for items! Browse around the /shop & see what the server shop buys things for so you can get an idea of what you should do to make money from it!

2. Make a massive buy/sell shop that has every single item in the game or most items, buy low and sell high method or whatever price makes you a profit. Advertisements about said shop in game and on marketplace via the server Discord to get your warp name out there! Building skills are necessary to attract & maintain the masses to attract them to keep coming back, unless you solely use a schematic you find online for a shop if you aren't that creative. Suppliers also help out with supplies needed for said shop warp, good idea to make several farms also to help out with items for your shop.

3. LEARN how to use Litematica, there are hundreds, if not thousands of FREE schematics of builds on the internet. Build dope ass schematics and sell for Small-Med-High profits whatever you desire, you also need to grind or buy the materials for this initially, bonus points if you know how to use WorldEdit Mod. If you know you know!

4. LEARN how to use the Litematica Mod & LEARN how to do Map Arts. Map Artists make a decent passive income with their maparts.

5. Merching, Flipping. Shop on /ah & local shops (where local shops are cool with reselling) be careful with reselling from shops, as reselling seems to be frowned upon by many players, make sure there is no signs stating that you aren't allowed to resell or you will get warp banned. Buy low sell high method once again but target specific items, flip for a profit.

6. Making maxed Weapons/Armors/Tools/Items with cool names or no cool names using the [/Rename] command to change the font or Recolor said item(s)! (Need Dionysus Voter Rank or Paid Poseidon Rank) selling said items for max amount of cash or negotiating a price for said items in a Player Owned Shop or /ah. People can be quite lazy and would rather buy Armor/Tools/Weapons vs making it themselves, sometimes even at a premium price.

7. Asking general chat for random jobs or advertise yourself frequently via in-game chat or on the marketplace on discord! Any job at all that you are willing to do, do it! Try to negotiate for a higher price etc, be useful in every way possible, people appreciate hard efficient workers who gets the job done fast.

8. [/jobs] & [/quests] another way to make money on Mystic!

9. Selling crate keys you get whether from playing the game or buying it with irl money from the Mystic server store, either sell the key itself to other players via /trade or /ah or sell the items you get from the crates itself.

10. Create/Copy/Paste Minecraft skins for people in game, you can easily make a profit doing this. Copy/paste heads and hair on any other skin you can find online. Negotiate prices. I did this during December for a santa skin, I learned how to do this from using a YouTube video.

11. If you are artistic with making digital art irl you can profit on this server, a profile picture I have used before which is stored on my computer somewhere was created by a person named ThirdCanDraw, I paid him around 1M to make me a Discord profile picture, I also paid Plyney to make me one also.

12. Building farms for people, Crop farms, Mob Farms, Villager Breeder Farm, Iron Farm, any Farm you can find on YouTube, BUILD IT and sell it.

13. Making a casino! I've seen a few player built casino's on Minecraft servers in general, players seem to profit off of them! General rule of thumb, as long as you are stating the odds, staff won't bother you much, people need know the odds before playing, which makes sense. I've heard people losing millions from a casino warp. I'm sure there are casino game guides on YouTube you can use.
