

How to Login To Google Classroom from Home

- 1) Open the Google Chrome web browser. 
**If you do not have Google Chrome, you can download it by following the instructions on this page: <http://bit.ly/3b0wpzd>
- 2) Go to google.com. I know it may sound silly because opening Google chrome will take you directly to Google. You need to do this so you can log in to Google with your NPS Chromebook username and password. You will see a blue "Sign In" button on the upper right corner of your screen that looks like this:

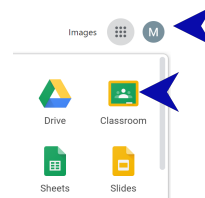

Click it and sign in with your NPS username and password.

- 3) It will take you to one or two NPS screens that will ask you to type in your username and password again.

- 4) Once signed in, you will be taken back to the Google page, but you will now see your first name's initial on the upper right corner of your screen. To its left is the "waffle". Click on it then find Google Classroom.
